Part 1 | The Basics

1.1 Access to Drupal Platform

1.1.1 Login

1. Go to the site URL.
2. Add "/user" at the end of the URL to go to the login page.

3. There are two methods to login, direct login click "LOG IN" and using "CAS Login".

 A screenshot of the login page for the HKUST Drupal Platform Demonstration. The page header includes the HKUST logo and the text 'THE HONG KONG UNIVERSITY OF SCIENCE AND TECHNOLOGY' and 'HKUST DRUPAL PLATFORM DEMONSTRATION'. The main content area has a 'Username' field with 'admin' entered, a 'Password' field with masked characters, and two buttons: 'LOG IN' and 'CAS LOGIN'. Below the fields, there is a prompt: 'Enter your Drupal Platform Demonstration - The Hong Kong University of Science and Technology username.' and 'Enter the password that accompanies your username.'

1.1.2 Logout

1. Go to "admin".
2. Click "Logout".

1.1.3 Reset Password

If you have forgotten your password, please refer to the guide in the link below.

<https://itsc.ust.hk/services/general-it-services/user-account/forgot-password>

1.2 Landing Page

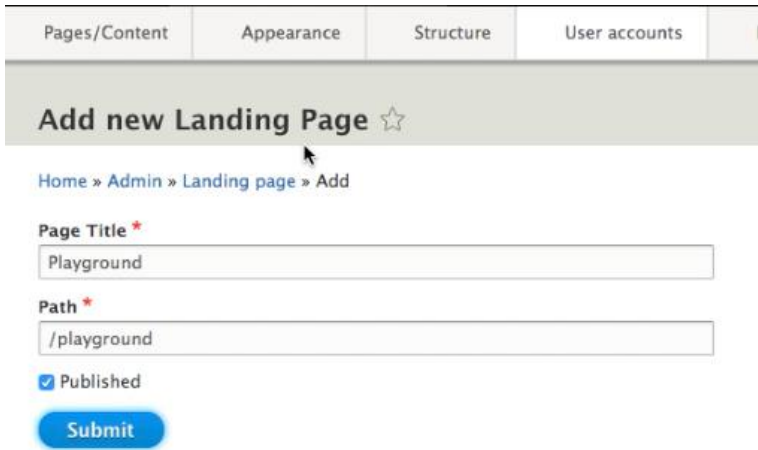

A landing page acts as an entry point to the website or sections of the website. In order to create new page, users are suggested to create new landing page.

1.2.1 Create New Landing Page (Demo Video 1)

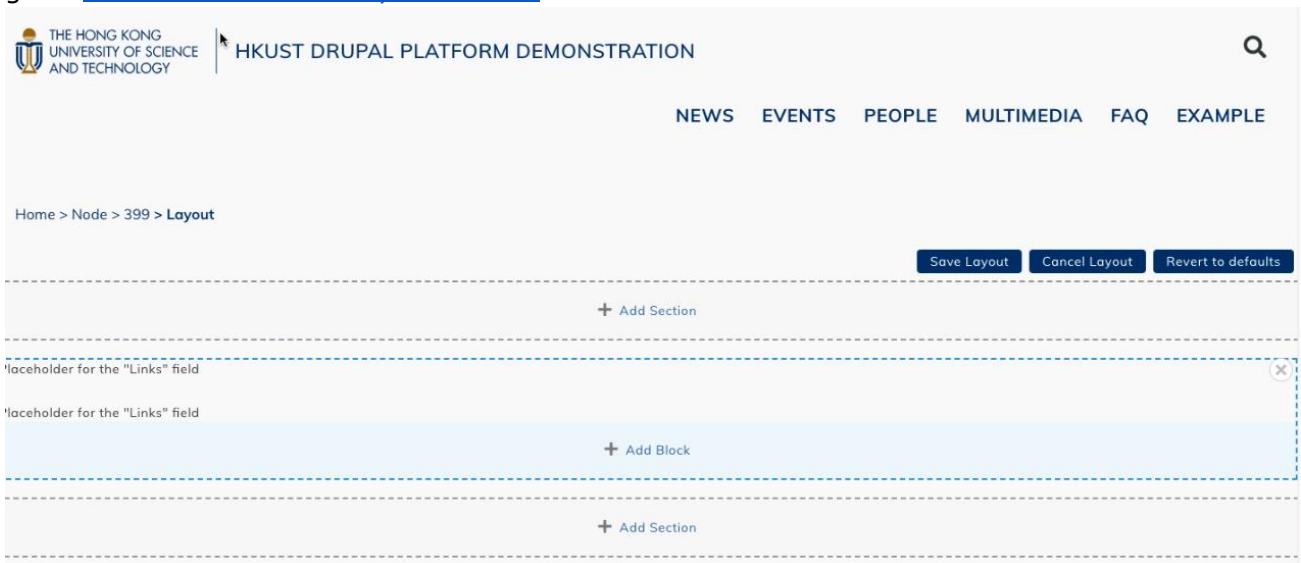

1. Go to “HKUST Drupal Platform” → “Pages / Content” → “Landing Pages”. Click “Add Landing Page”.

2. Input the page name (Page Title) and URL alias^{#1} (Path), which will be shown after the domain name and click “Submit”.

3. Landing page has been created and the page is redirected to Layout Builder. For details, please go to [2.1 Introduction to Layout Builder](#).

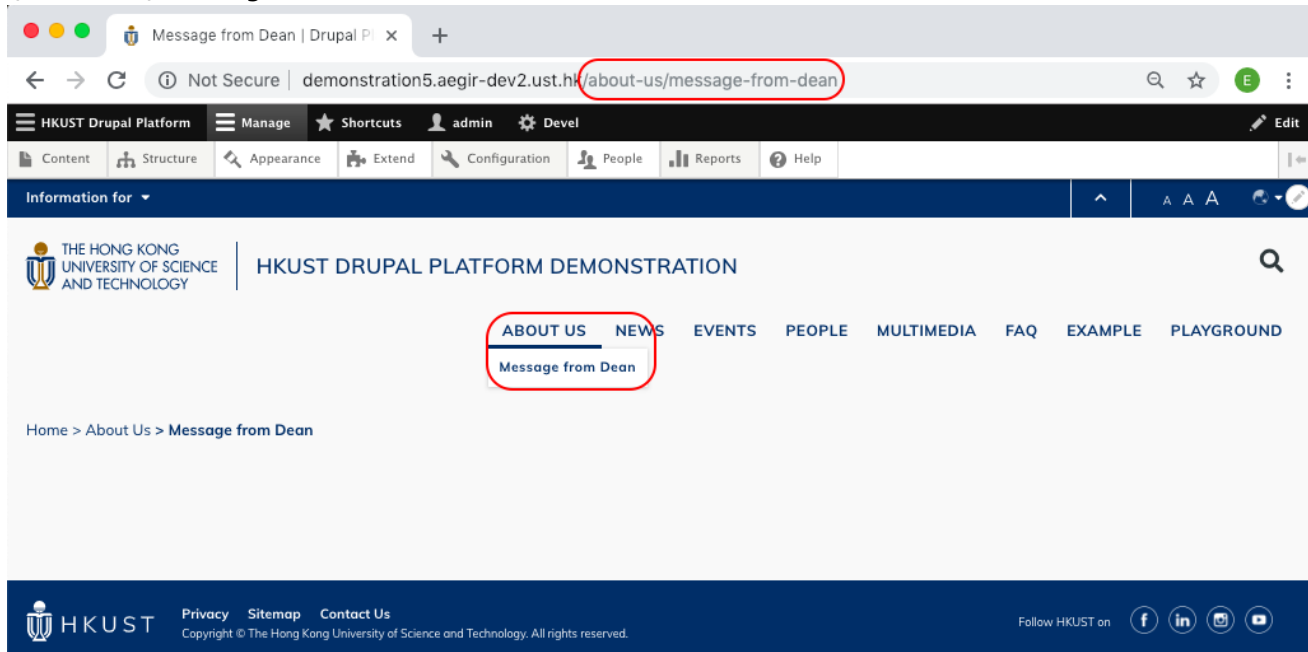

Remark

#1 What is URL Alias?

URL alias is the path of the link to direct visitors to the landing page that you create. Please be reminded that the path should not include any space. After completion of creating landing page, the path would be shown at the URL bar of that landing page.

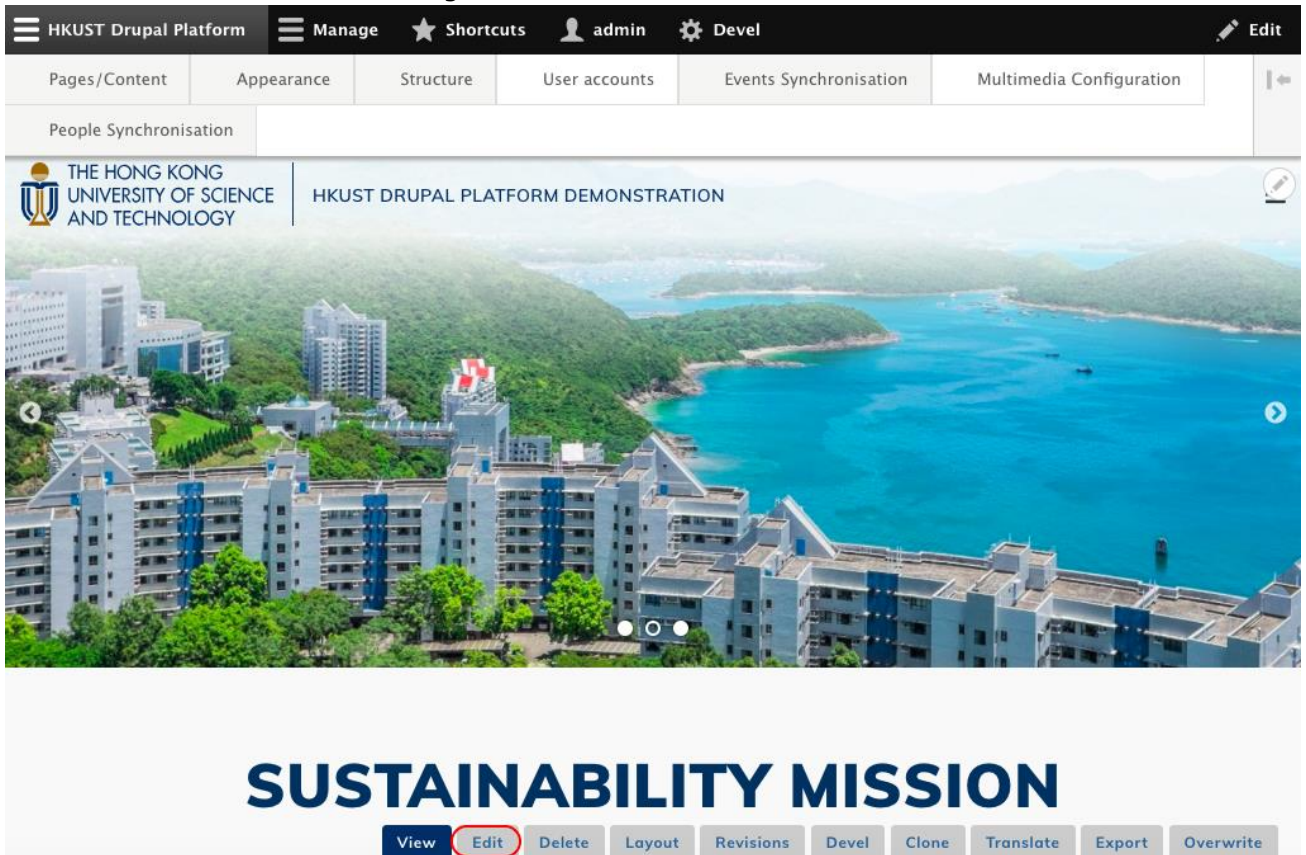

For example, if user would like to create a new landing page "Message from Dean" under the existing landing page, "About Us", path of the new landing page should be under that of "About Us", i.e., "/about-us/message-from-dean".

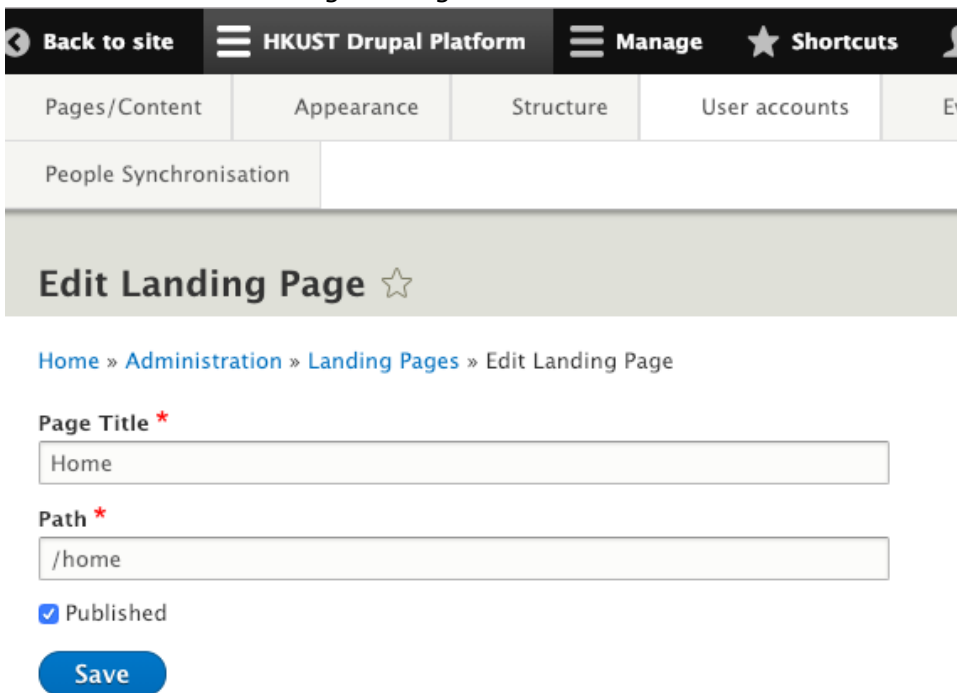

1.2.2 Edit Landing Page#2

1. Go to the toolbar under the landing page.

2. Click "Edit" from the toolbar in right bottom corner.

3. Click "Save" after editing the Page Title and Path.

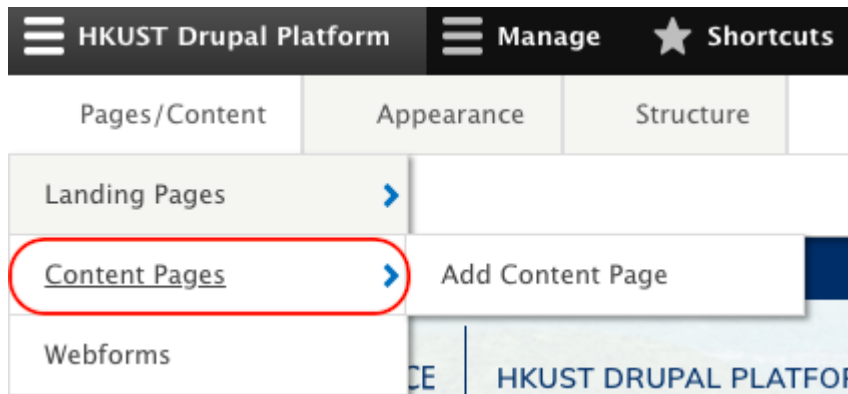

Remark

#2 Do not edit the paths of modules with dynamic content which are FAQ, Multimedia (Publication, Video and Gallery), News, Event and People.

1.2.3 Disable Landing Page

1. Go to "HKUST Drupal Platform" → "Pages / Content" → "Content Pages".

- Select "Landing Page" under "Content type" and click "Filter" to filter the Landing Page type contents only.

Part 2 | Introduction to Layout Builder

2.1 Layout Builder^{#3}

Layout Builder is the tool used to update page layout and content. The structure of a page as below.

The view of Layout Builder is as below. Layout Builder could be redirected from Creating New Landing Page. Another method to enter Layout Builder is to click "Layout" at the Drupal footer toolbar at right bottom corner.

Each page can be built with sections and each sections can be built with blocks. For the guide to create a landing page, please refer to [1.2.1 Create New Landing Page](#). You will learn how to create a section and block in the parts below.

Remark

^{#3} Do not use Layout Builder to edit the sections and blocks of modules with dynamic content which are FAQ, Multimedia(Publication, Video and Gallery), News, Event and People.

2.2 Section

When we are creating a new section, it is required to choose a specific section layout . Here are some common section layouts:

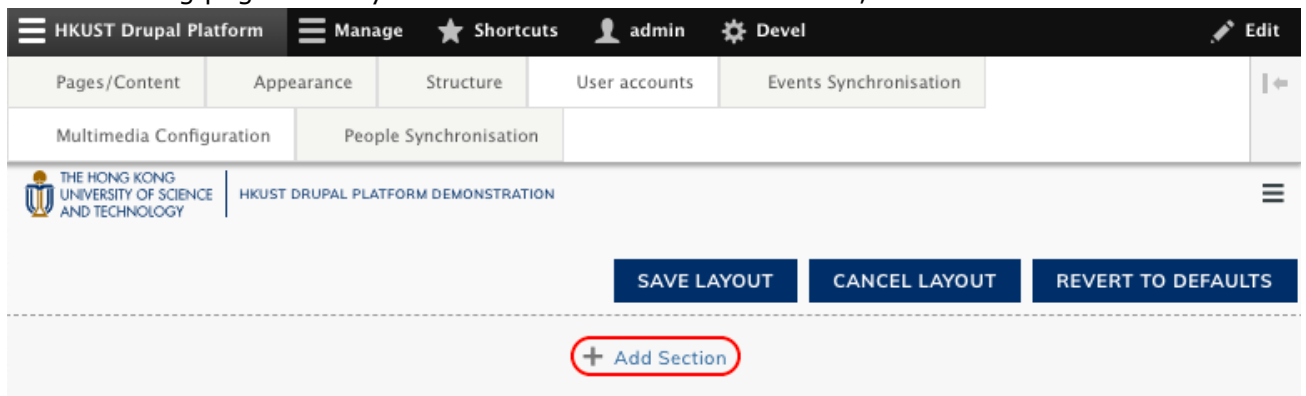

- Content Area - Full Width
- Content Area - Bounded
- Content Area - Two columns (50/50)
- Content Area - Three columns (33/33/33)

Section Layouts like "Content Area - Two columns" helps user to divide the section into two (or more) blocks. However, using Section Layouts above limits user with the number of columns per section. There is another method to put columns in the sections manually, which is to use the block "Columnized Static Content". Refer to [3.8.3 Columnized Static Content](#) for details.

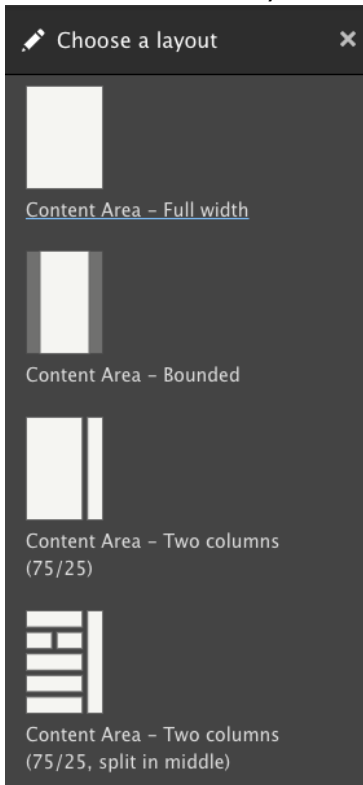

We could also add styling to each section by assigning the section to different CSS Class.

2.2.1 Create New Section (Demo Video 1)

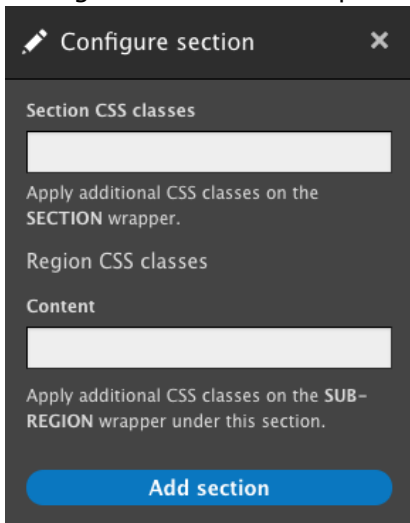

1. In the landing page where you would like to create new section, click "Add Section".

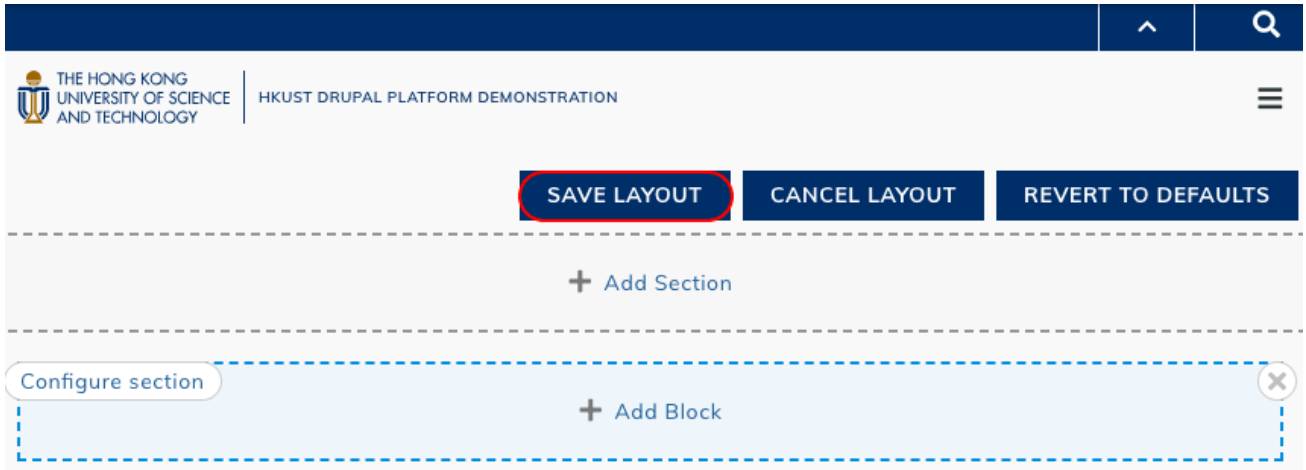

2. Choose a section layout.

3. Configure the section. Input the Section CSS classes and click "Add section".

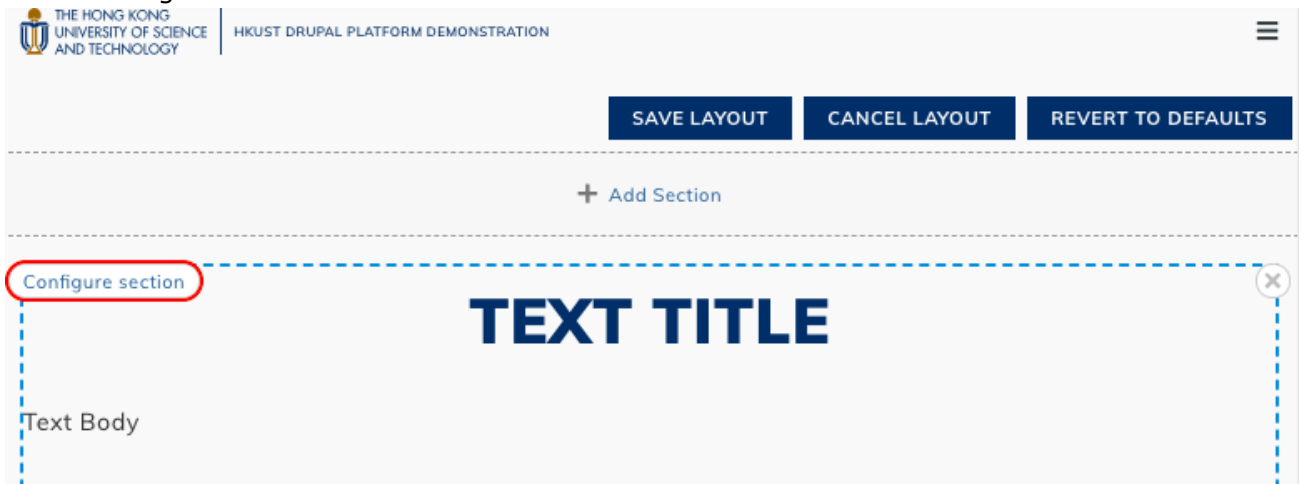

4. A section has been added to the page. (Refer to [2.3 Block](#) to add block to the section)
Click "Save Layout" to save the page.

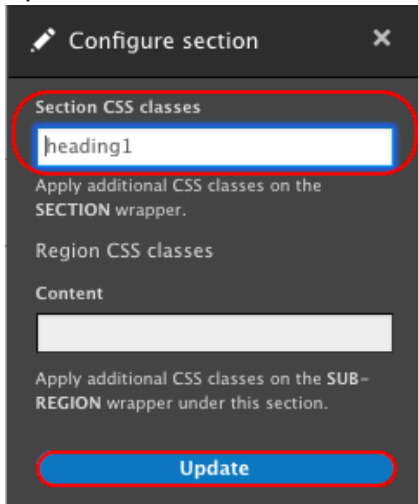

2.2.2 Edit Section

It is not allowed to edit the layout once the section has been created. It is only allowed to edit the styling i.e., CSS class of the section.

1. Click "Configure section".

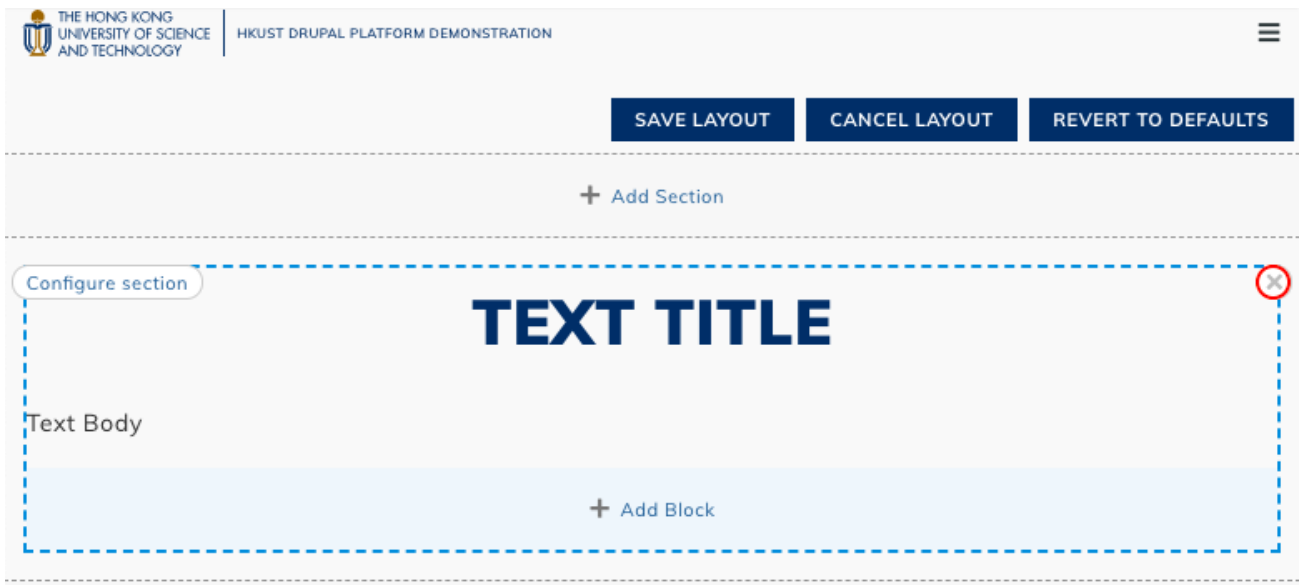

- Update the Section CSS classes and click "Update".

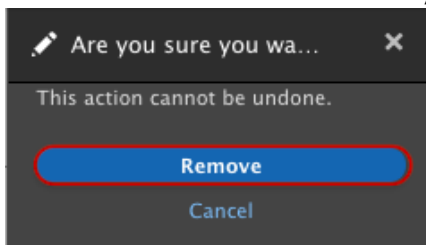

2.2.3 Delete Section

- Go to the section to be deleted and click the cross.

- Confirm to delete the section by clicking "Remove".

2.3 Block

In HKUST Drupal Platform, user should only use the following 5 types of blocks. The other types are not applicable.

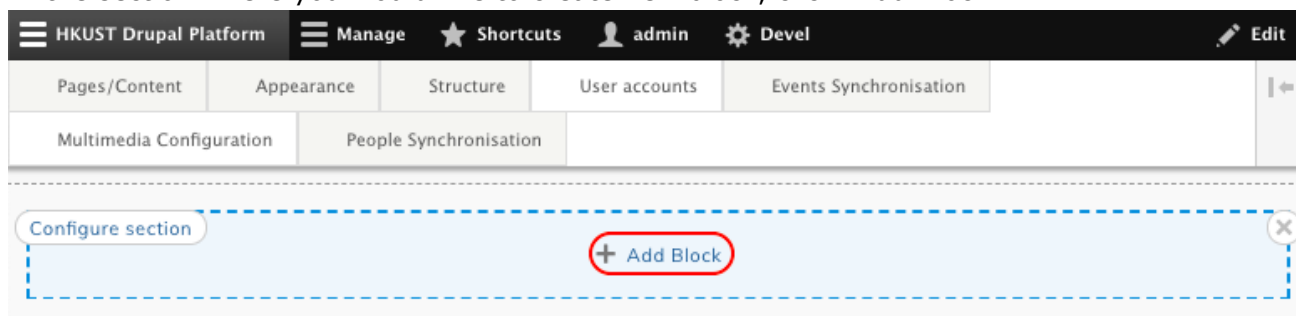

- HKUST Core
- HKUST Core - UI Elements
- HKUST Core - UI Elements (Events)
- HKUST Core - UI Elements (Multimedia)
- HKUST Core - UI Elements (News)

And here are some common blocks:

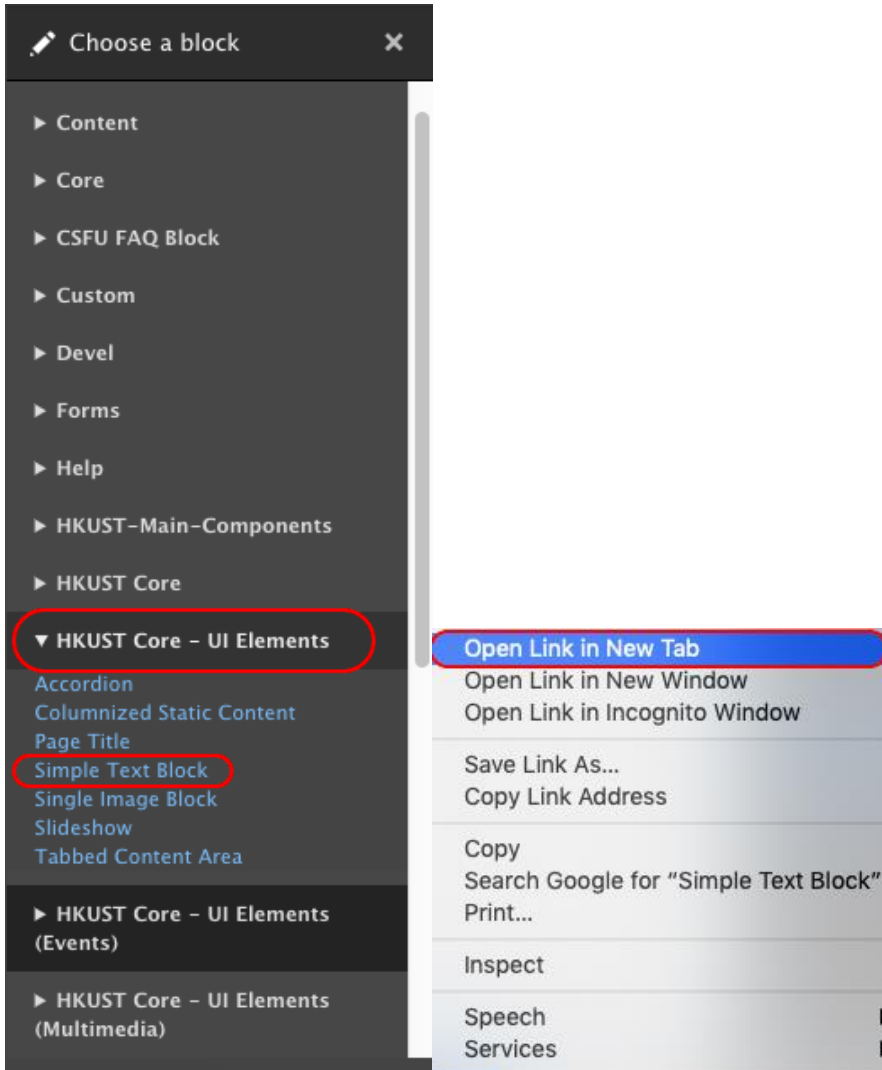

- HKUST Core - UI Elements → Simple Text Block
- HKUST Core - UI Elements → Simple Image Block
- HKUST Core - UI Elements → Accordion
- HKUST Core - UI Elements → Columnized Static Content
- HKUST Core - UI Elements → Slideshow
- HKUST Core - UI Elements → Tabbed Content Area

2.3.1 Create New Block (Demo Video 1)

1. In the section where you would like to create new block, click "Add Block".

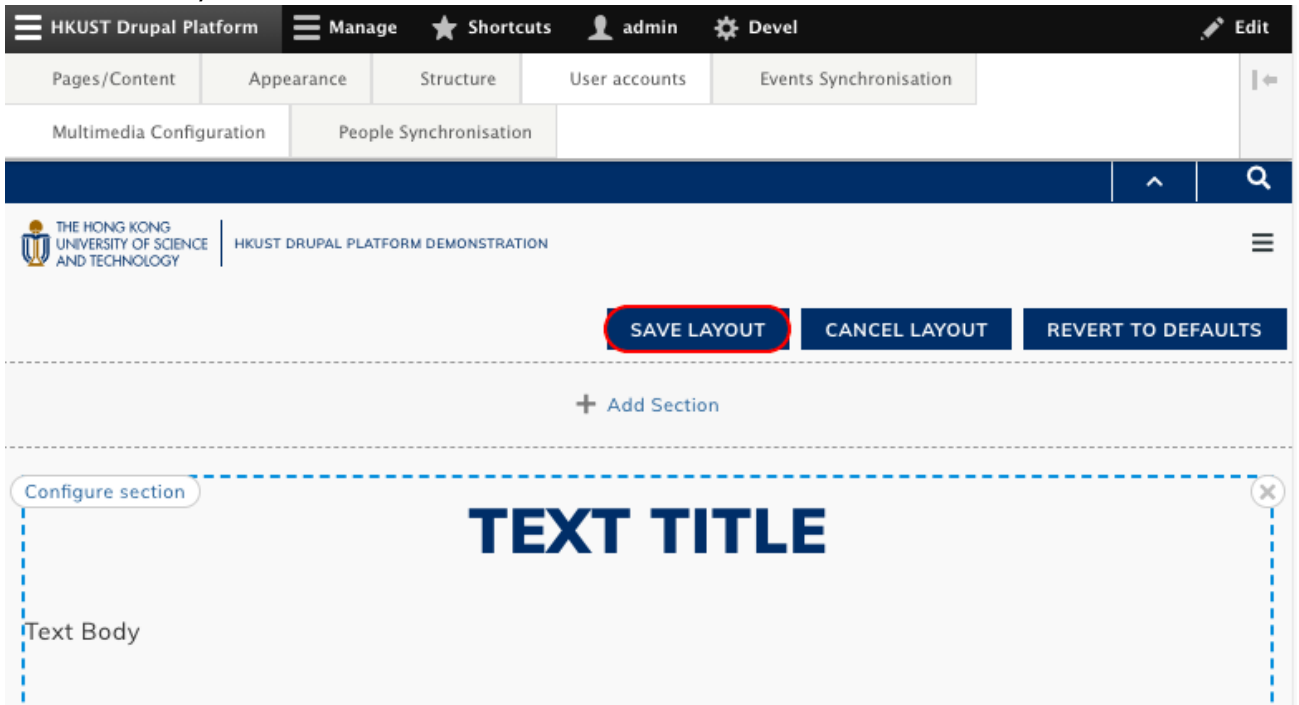

2. Select the block to be created. For example same as the demo video, we need to insert text. Go to "HKUST Core - UI Element" and select "Simple Text Block" by right click to open a new tab.

3. Click "Add Block" after finishing editing.

The screenshot shows the Drupal administration interface. At the top, there is a navigation bar with the following items: HKUST Drupal Platform, Manage, Shortcuts, admin, and Devel. Below this is a secondary navigation bar with tabs for Pages/Content, Appearance, Structure, User accounts, and Events Synchronisation. A third bar contains Multimedia Configuration and People Synchronisation. A star icon is visible below these bars. The main content area shows a breadcrumb trail: Home » Hkust simple text. Below this, the 'Block description' section is titled 'Simple Text Block'. The 'Title' field is marked with an asterisk and contains the text 'Text Title'. There is a checked checkbox for 'Display title'. The 'Header Color' is set to a dark blue color. The 'Body' section contains a rich text editor with a toolbar including bold, italic, strikethrough, underline, text color, background color, link, unlink, list, ordered list, quote, image, table, and styles. The text area contains the text 'Text Body'. Below the editor, the text format is set to 'Full HTML'. A blue 'Add Block' button is highlighted with a red circle.

4. Click "Save Layout" to save the block creation.

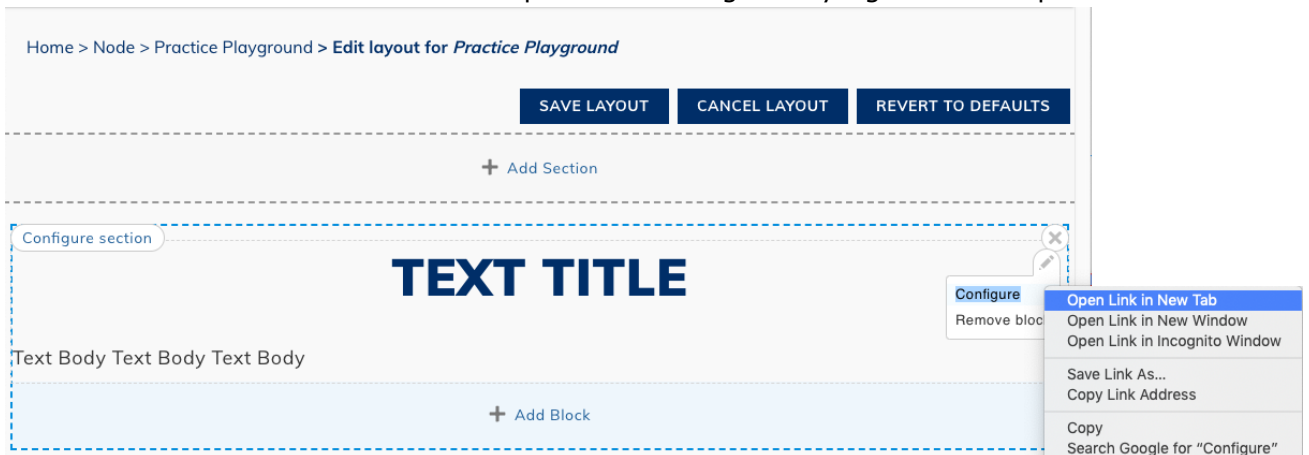

5. A successful message "The layout override has been saved." would appear.

2.3.2 Edit Block

1. Go to the block to be edited. Click the pen and "Configure" by right click to open a new tab.

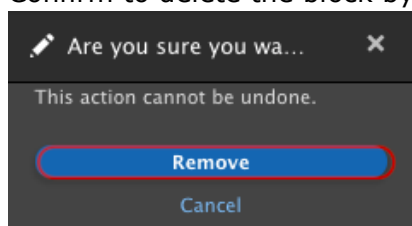

2. After editing the block, click "Update" to save the update.

2.3.3 Delete Block

1. Select the block to be deleted, click the pen on right top corner of the block and click "Remove block".

2. Confirm to delete the block by clicking "Remove".

2.4 Commonly-Used Mapping of Sections, CSS Classes and Blocks

Styling Description	Related Guide	Section Layout	Section CSS Class	Block
Insert text in bounded section	2.2.1 Create New Section	Content Area - Bounded	heading1	HKUST Core - UI Elements → Simple Text Block
Insert image (align centre) in bounded section	3.2 Image - Method B	Content Area - Bounded	img-center-important	HKUST Core - UI Elements → Simple Image Block
Insert image (align left) in bounded section	3.2 Image - Method B	Content Area - Bounded	Nil	HKUST Core - UI Elements → Simple Image Block
Insert slideshow in full-width section	3.3 Slideshow	Content Area - Full Width	Nil	HKUST Core - UI Elements → Slideshow
Insert Latest News in bounded section	3.7.2 Update Latest News Block	Content Area - Bounded	heading4-with4	HKUST Core → News: Latest 4 News
Insert Latest Event in bounded section	3.7.4 Update Latest Event Block	Content Area - Bounded	heading4-with4	HKUST Core → Events: Nearest 3 events
Insert Accordion Module in bounded section	3.8.1 Accordion Module	Content Area - Bounded	Nil	HKUST Core - UI Elements → Accordion
Insert Tab Module in bounded section	3.8.2 Tab Module	Content Area - Bounded	Nil	HKUST Core - UI Elements → Tabbed Content Area
Create section with more than 1 column in full-width section	3.8.3 Columnized Static Content	Content Area - Full Width	heading4-with4	HKUST Core - UI Elements → Columnized Static Content
Create section with	3.8.3	Content Area	heading4-with4	HKUST Core - UI Elements

more than 1 column in bounded section	Columnized Static Content	- Bounded		→ Columnized Static Content
Insert section break in full-width section	3.8.4 Section Break	Content Area - Full Width	section-break	(Any Blocks)
Insert section break in bounded section	3.8.4 Section Break	Content Area - Bounded	section-break	(Any Blocks)

Part 3 | Common Content Update

3.1 Text

3.1.1 Text Editing Format

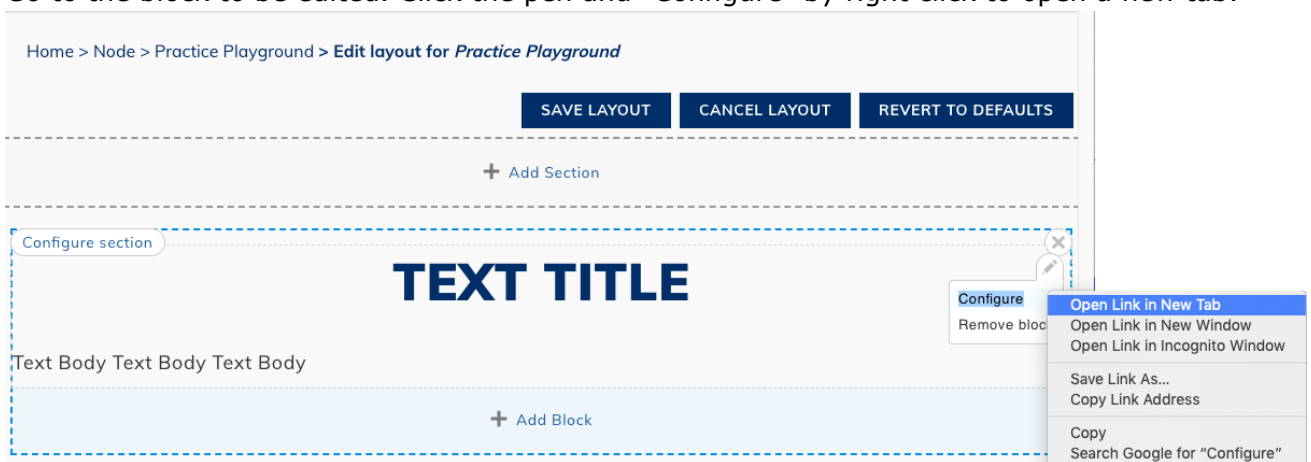

Prerequisite:

Create a section with layout and CSS class and block stated below.

(Refer to [2.2 Section](#) and [2.3 Block](#) to create section and block)

Section Layout	Section CSS Class	Block
Content Area - Bounded	heading1	HKUST Core - UI Elements → Simple Text Block

1. Go to the block to be edited. Click the pen and "Configure" by right click to open a new tab.

2. Go to "Body" and update body text with the tools below.

Tool Icon	Body Text Formatting Description
B I S U x² x₂	Bold, Italic, Strikethrough, Underline, Superscript, Subscript
<i>I_x</i> ≡ ≡ ≡	Remove Format, Align Left, Align Centre, Align Right
•≡ 1≡	Bulleted List, Numbered List
≡	Insert Horizontal Line
Format ▾	Text Format: Use only "Normal", "Heading 2", "Heading 3" or "Heading 4" here only as used for Title

3.1.2 Hyperlink

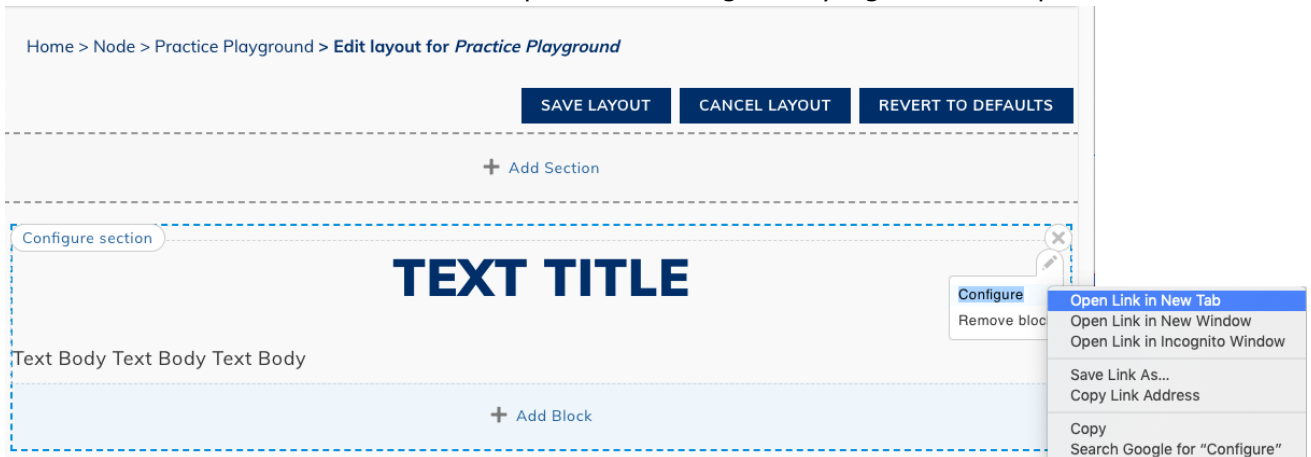

Prerequisite:

Create a section with layout and CSS class and block stated below.

(Refer to [2.2 Section](#) and [2.3 Block](#) to create section and block)

Section Layout	Section CSS Class	Block
Content Area - Bounded	heading1	HKUST Core - UI Elements → Simple Text Block

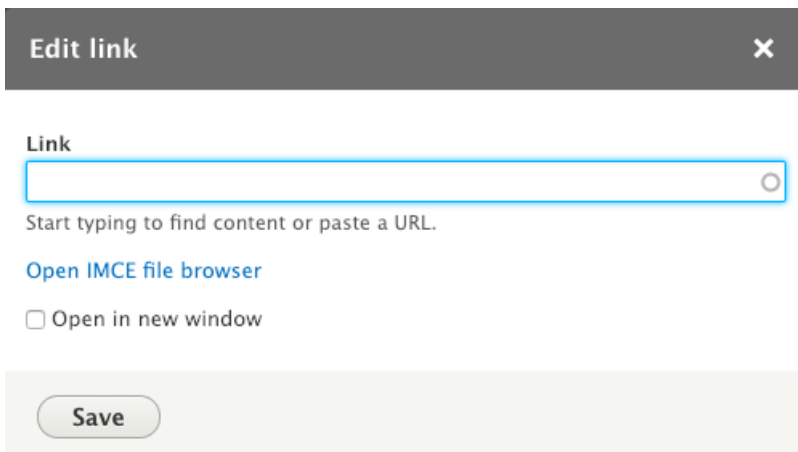

1. Go to the block to be edited. Click the pen and "Configure" by right click to open a new tab.

2. Go to "Body" and click the circled icon to insert hyperlink.

3. Insert the link in the field "Link" and click "Save".

Link to External and Internal Websites

For links to external websites, insert the full URL starting with "http://" or "https://". For example, if the link is to be redirected to google.com, the link "<https://www.google.com/>" should be inserted. For links to internal pages, it is not required to insert the domain. For example, in the site "<http://demonstration5.aegir-dev2.ust.hk/>", if the link is to be redirected to News "<http://demonstration5.aegir-dev2.ust.hk/news>", only the link "/news" should be inserted.

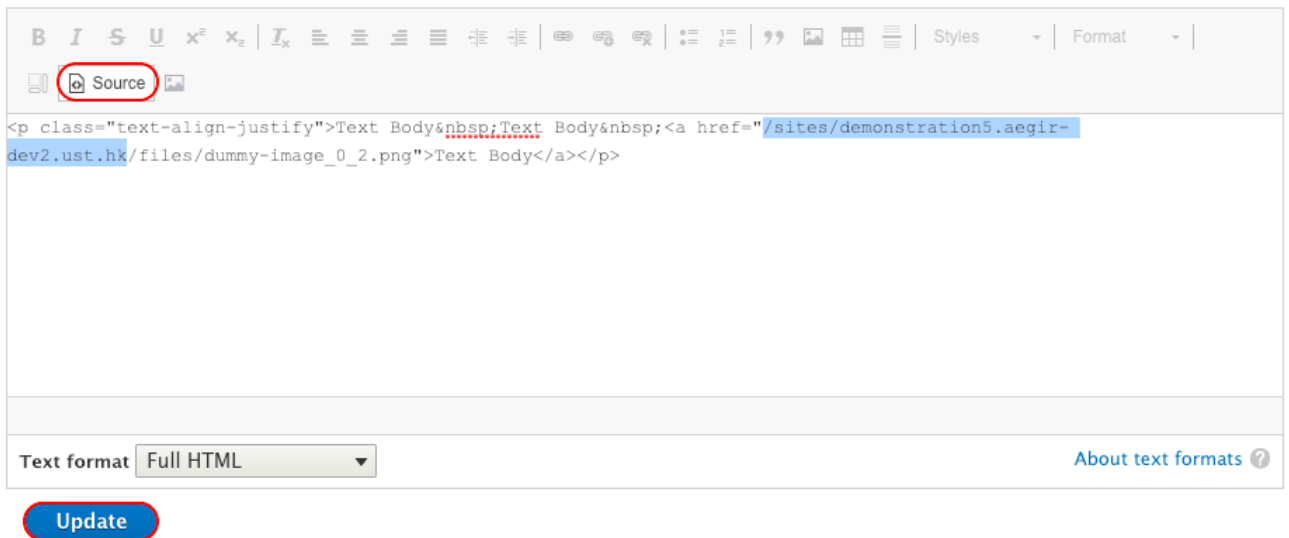

Link to Images

The image to be embedded should be uploaded to web server before creating link. (Refer to 3.2 Image - [Upload Image to Web Server](#)) For links to image, click "Open IMCE file browser" and select image from File Manager on the web server.

Open in Same Tab and New Tab

The link redirected will be opened in the same window, same tab. If you would like the link to be opened in a new tab, check "Open in new window".

- For link to image, go to Body and click "Source". Remove the file name before "/files". Click "Update" and save the layout of the page.

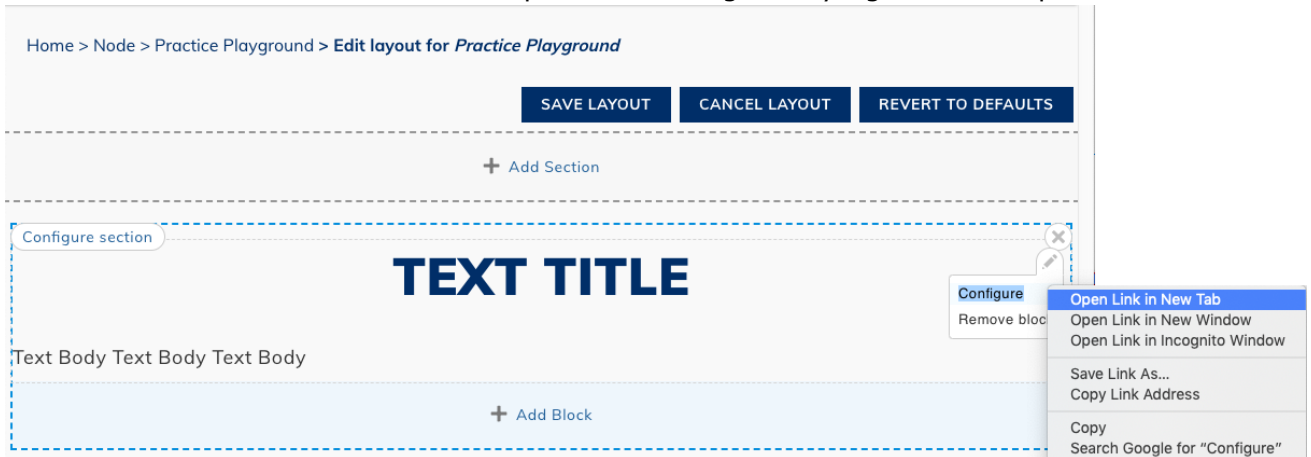

3.1.3 Table

Prerequisite:

Create a section with layout and CSS class and block stated below. (Refer to [2.2 Section](#) and [2.3 Block](#) to create section and block)

Section Layout	Section CSS Class	Block
Content Area - Bounded	heading1	HKUST Core - UI Elements → Simple Text Block

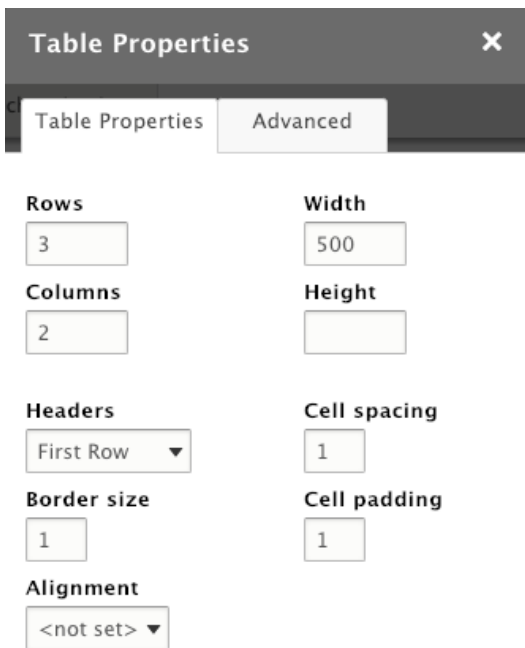

1. Go to the block to be edited. Click the pen and "Configure" by right click to open a new tab.

2. Go to "Body" and click the circled icon to insert table.

3. Update the Table Properties like "Rows", "Columns" and "Alignment". Choose "First Row" for Headers.

- Uncheck "Display title" to hide the title of the table. Click "Source" and update the first row about table border with the codes below.

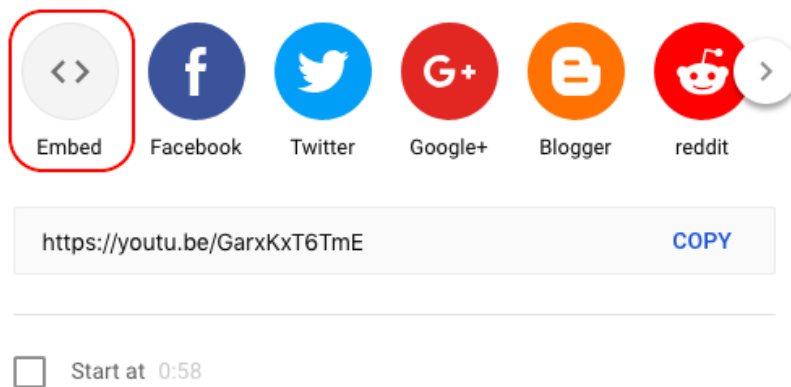

```
<table border="1" cellpadding="1" cellspacing="0" class="tablesaw tablesaw-stack" data-tablesaw-mode="stack">
```

To edit the table property, select the table and right click to select Table Property and edit the height, width. Do not drag the table width.

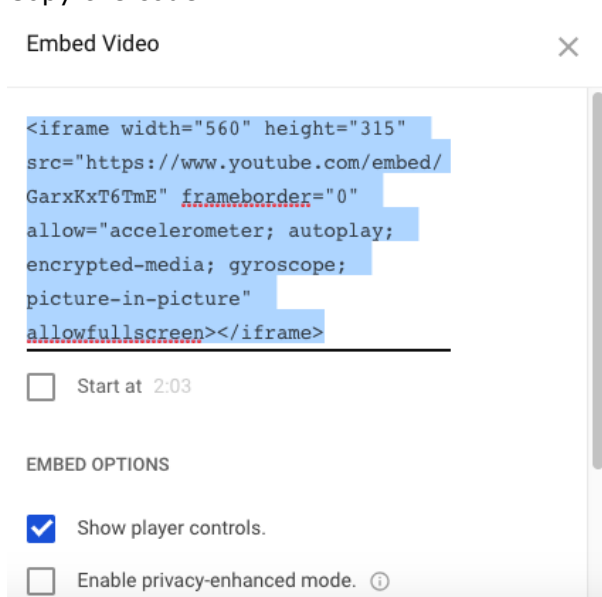

- Click "Update" and save the layout of the page.

3.1.4 Youtube Video

- Go to youtube video link and click "SHARE".
- Click "Embed".

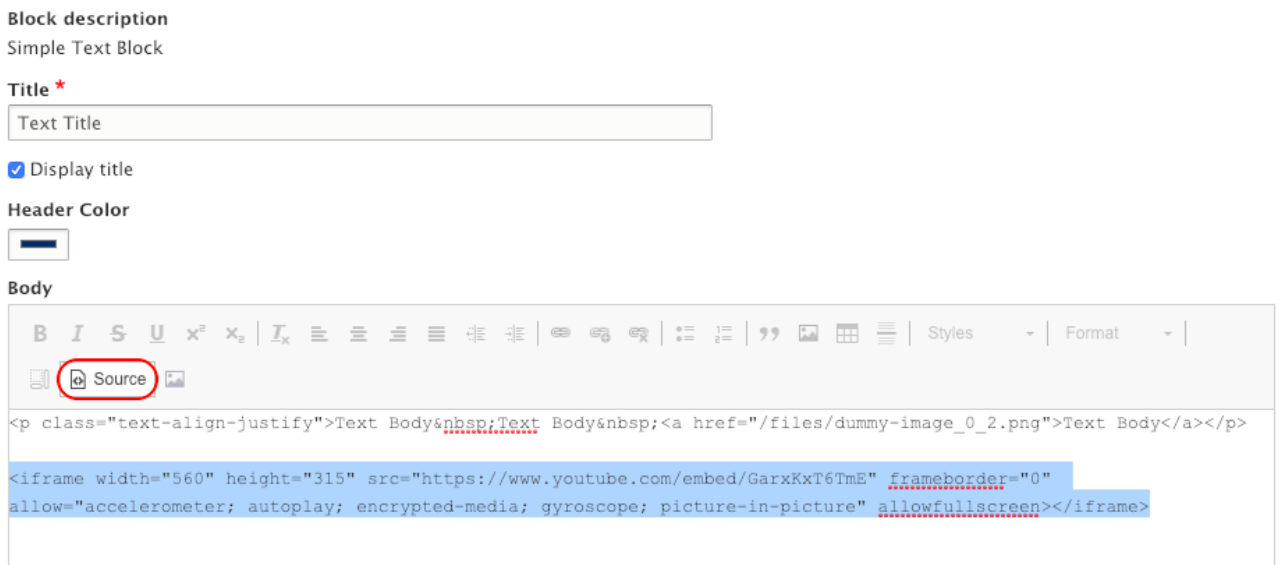

- Copy the code.

- Go to the block where the YouTube video would be added. Click the pen and "Configure" by right click to open a new tab.

- Go to "Body" and click "Source". Paste the codes to the body.

- Click "Update" and save the layout of the page.

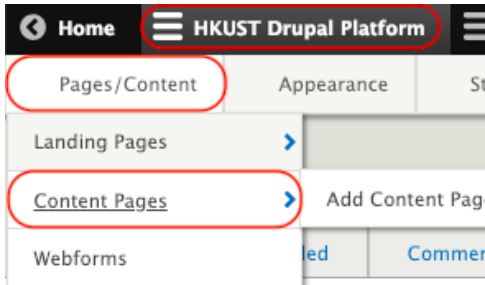

3.2 Image

Image can be inserted in Simple Text Block (along with other texts) and Simple Image Block.

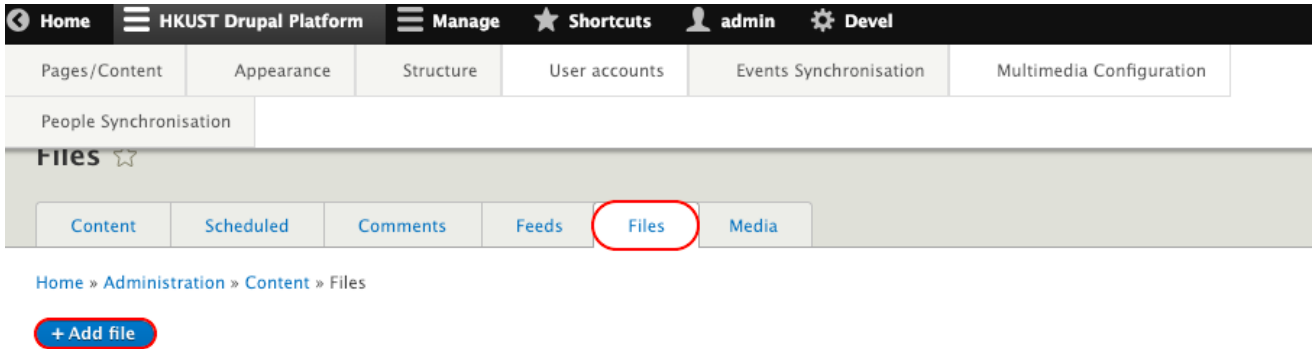

Method A - To Embed Image in Simple Text Block

Upload Image to Web Server

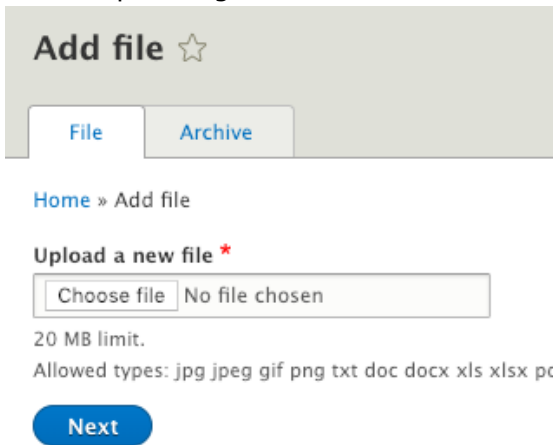

1. Go to “HKUST Drupal Platform” → “Pages / Content” → “Content Pages”.

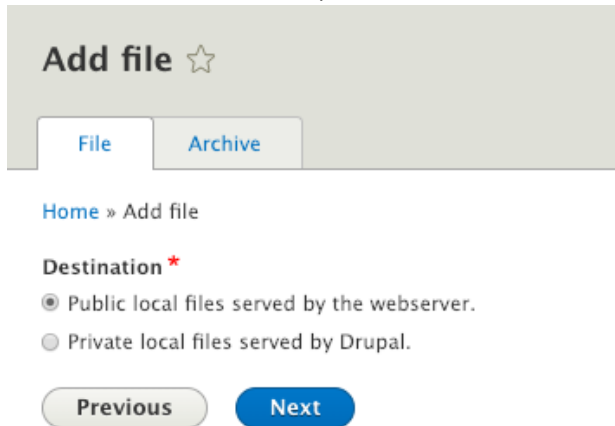

2. Click “Files” and “Add File”.

3. Click “Choose file” to choose image from local path. Remember to rename the local file name before uploading. Click “Next”.

4. Choose the Destination, "Public local file served by the webservice".

Add file ☆

[File](#) [Archive](#)

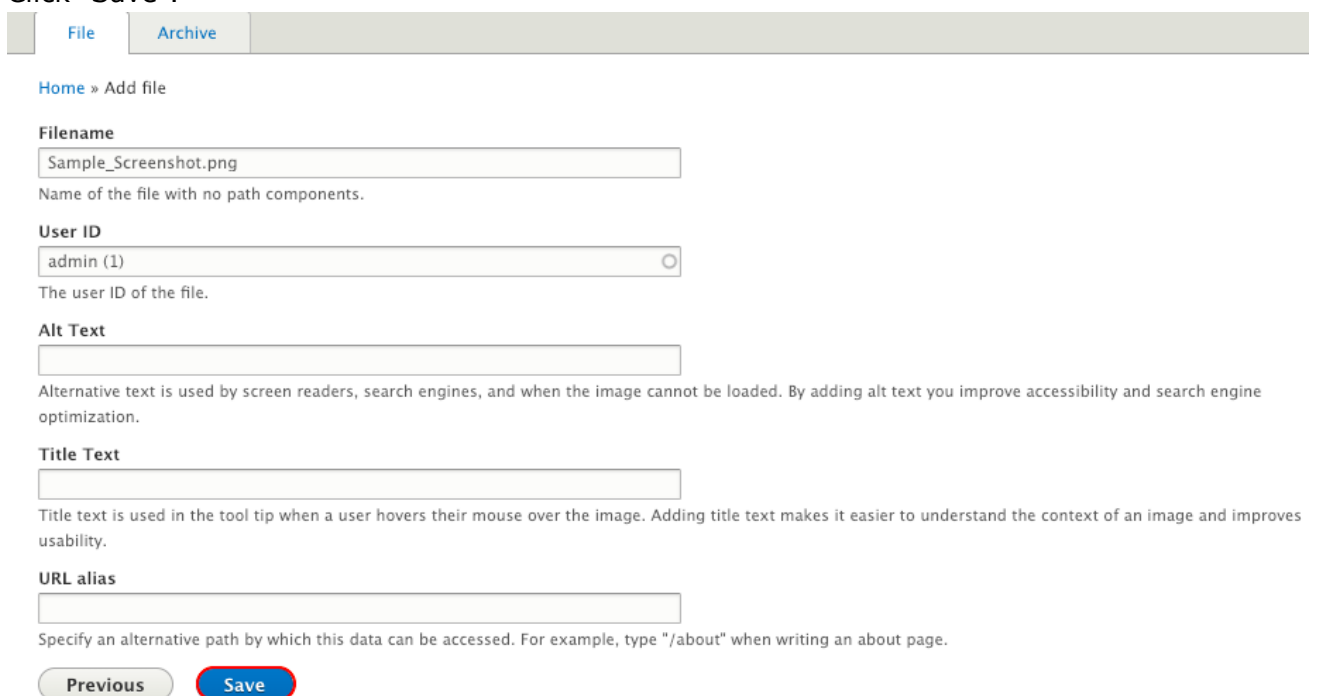

[Home](#) » Add file

Destination *

- Public local files served by the webservice.
- Private local files served by Drupal.

[Previous](#) [Next](#)

5. Click "Save".

[File](#) [Archive](#)

[Home](#) » Add file

Filename

Name of the file with no path components.

User ID

The user ID of the file.

Alt Text

Alternative text is used by screen readers, search engines, and when the image cannot be loaded. By adding alt text you improve accessibility and search engine optimization.

Title Text

Title text is used in the tool tip when a user hovers their mouse over the image. Adding title text makes it easier to understand the context of an image and improves usability.

URL alias

Specify an alternative path by which this data can be accessed. For example, type "/about" when writing an about page.

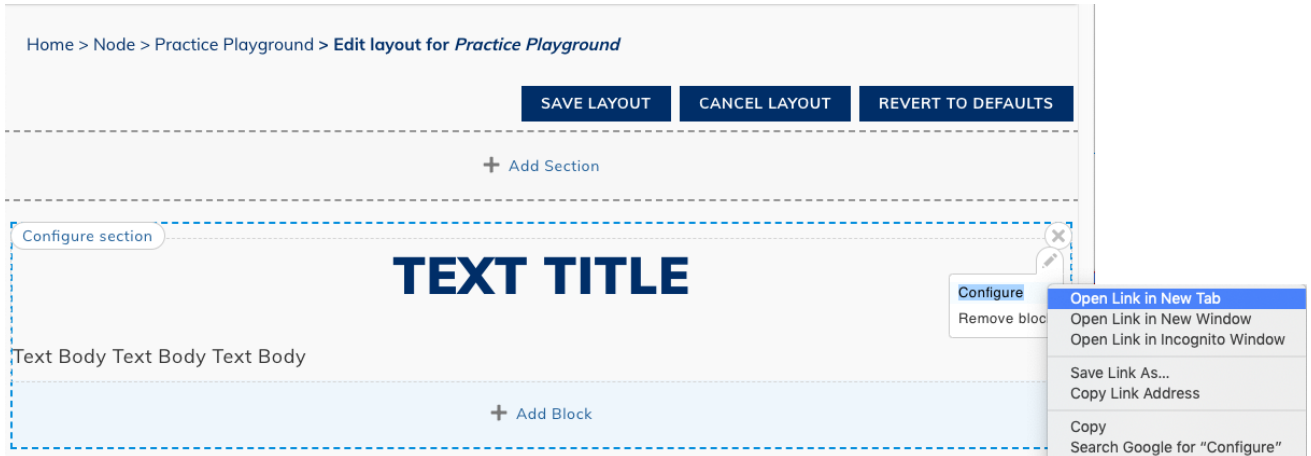

[Previous](#) [Save](#)

6. A message "Image XXX was uploaded." would appear.

Embed Image in Simple Text Block

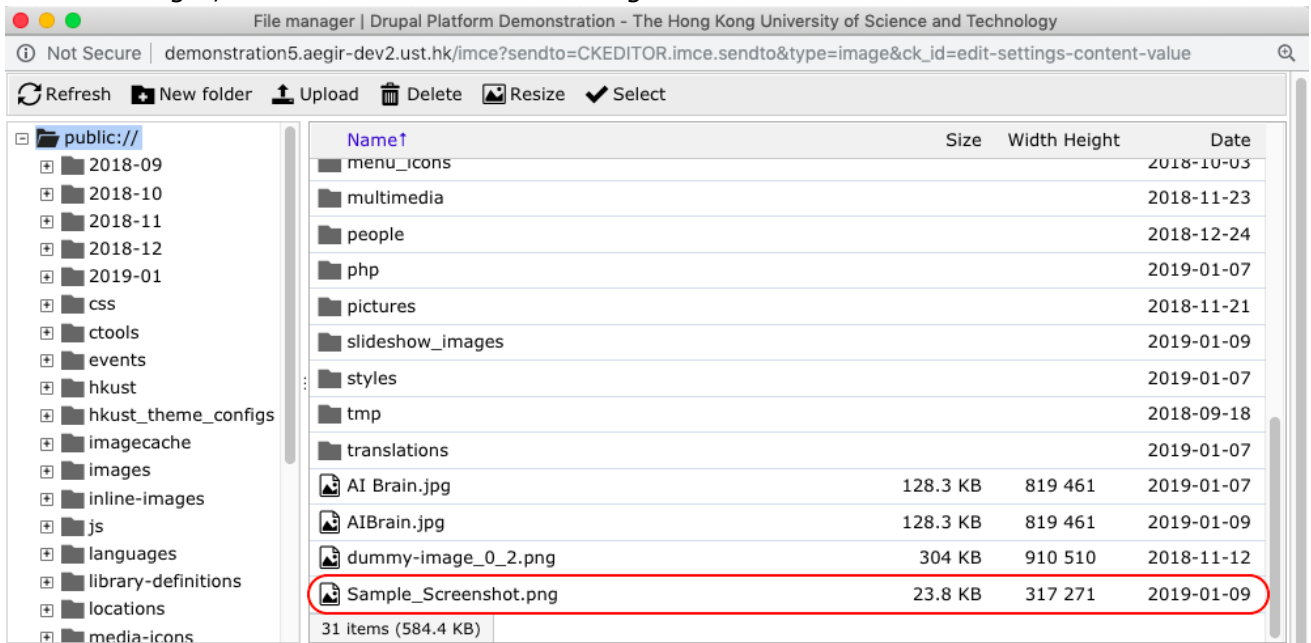

- Go to the Simple Text Block where the image would be added. Click the pen and "Configure" by right click to open a new tab.

- Go to "Body" and click the circled icon to embed image

- In File Manager, double-click to select the image to be embedded.

- Click "Source" and remove the file name before "/files".

- Click "Update" and save the layout of the page.

Method B - To Insert Image Block Directly

Prerequisite:

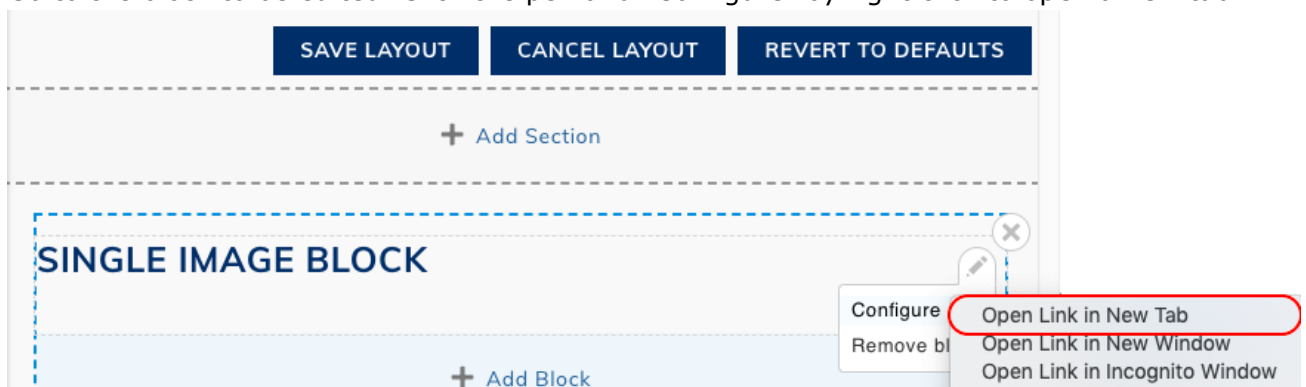

Create a section with layout and CSS class and block stated below.

(Refer to [2.2 Section](#) and [2.3 Block](#) to create section and block)

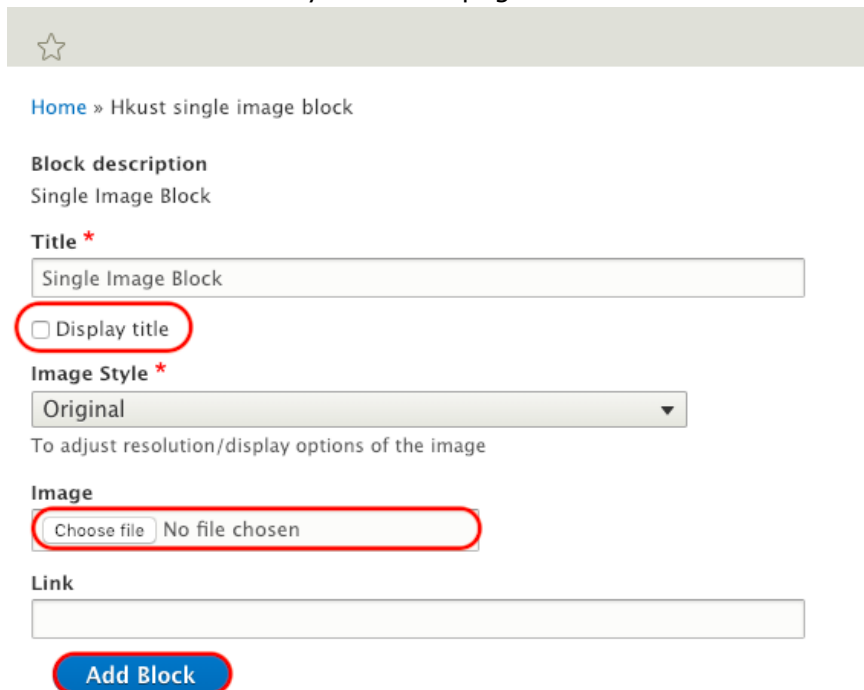

Section Layout	Section CSS Class	Block
Content Area - Bounded	Nil	HKUST Core - UI Elements → Simple Image Block
Content Area - Bounded	img-center-important	HKUST Core - UI Elements → Simple Image Block

For images to be aligned left, it is not required to input Section CSS Class. For images to be aligned centre, "img-center-important" should be selected for Section CSS Class.

- Go to the block to be edited. Click the pen and "Configure" by right click to open a new tab.

- Uncheck "Display title" to hide the title of the image. Click "Choose file" to choose image from local path. If necessary, input link which will be redirected from the image. Then click "Add Block" and save the layout of the page.

3.3 Slideshow

Slideshow is a block to be put under a section on a landing page. Instructions below demonstrate the specific guide to create a slideshow.

1. Create a section with layout and CSS class and block stated below
(Refer to [2.3 Block](#) to create, edit and delete a block)

Section Layout	Section CSS Class	Block
Content Area - Full Width	Nil	HKUST Core - UI Elements → Slideshow

2. Input the field listed below in Block Description

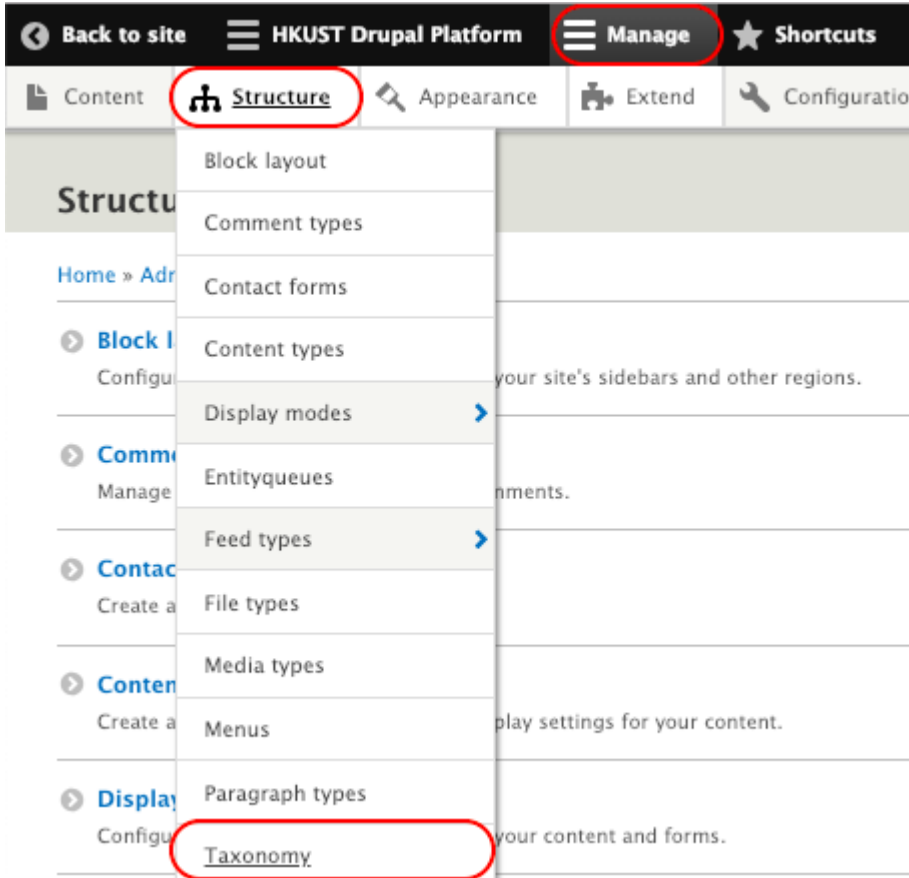

No.	Field Name	Field Nature	Remark
1	Title	Mandatory	Title of the slideshow. If title is not required to be shown, uncheck "Display title"
2	Slider mode	Mandatory	Default slide mode is Multiple Mode
3	Autoplay speed	Optional	Default speed is 4000
4	Slide to Show	Mandatory	Default number of slide to show at a time is 2
5	Slide to scroll	Mandatory	Default number of slide to scroll at a time is 1
6	Description Position	Mandatory	Default description position is Hidden
7	Image Style	Mandatory	Choose "home_banner" as Image Style for slideshow
8	Image	Optional	Click "Choose file" to upload image. Click "Add one more" to add new images
9	Link	Optional	Input link to the image. You could choose to open in current window or new window

3.4 FAQ

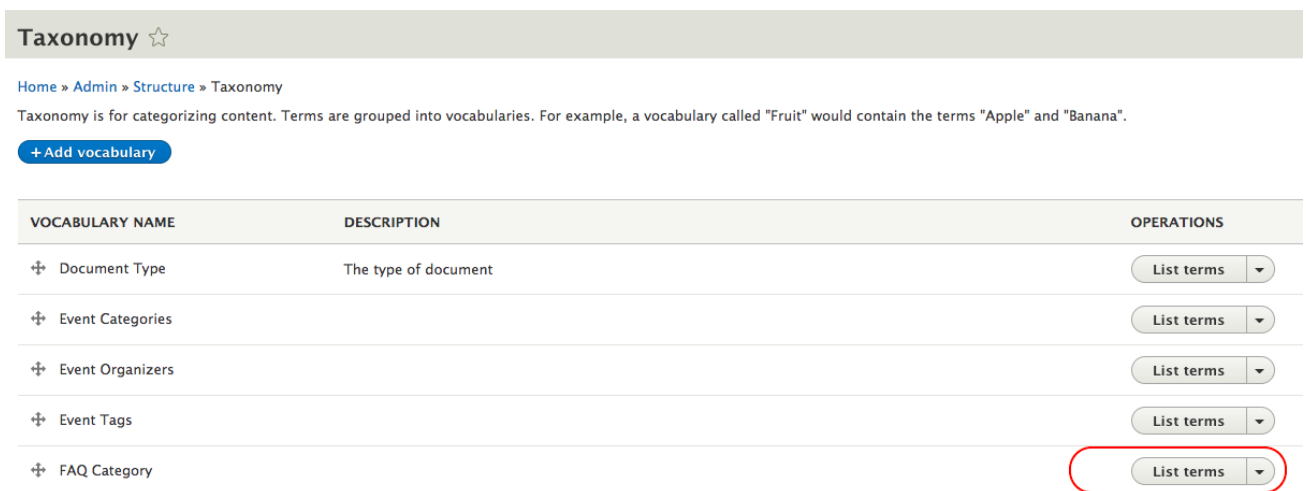

3.4.1 FAQ Category

3.4.1.1 Create New FAQ Category

1. Go to "Manage" → "Structure" → "Taxonomy"

2. Go to "FAQ Category" and click "List terms"

3. Click "Add term"

Home » Admin » Structure » Taxonomy » Faq category » Overview

You can reorganize the terms in *FAQ Category* using their drag-and-drop handles, and group terms under a parent term by sliding

[+ Add term](#)

4. Input the name of FAQ category and save
Remark: You may just leave the rest of the optional fields blank

5. A successful message "Created new term XXX." would appear

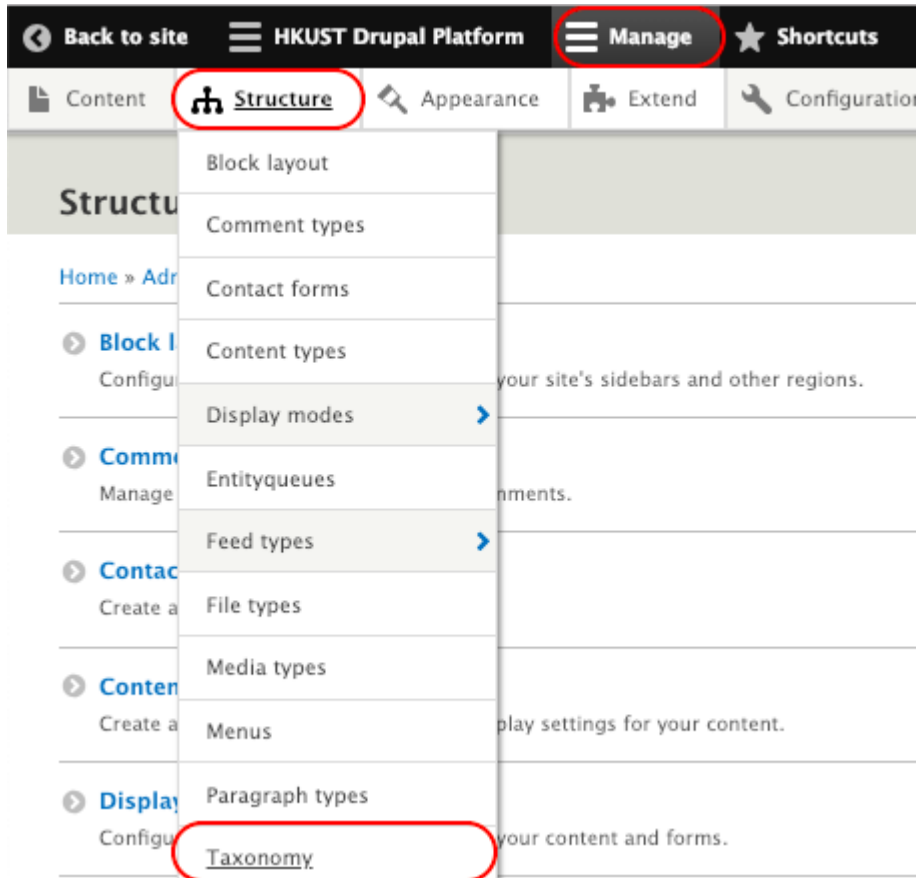

- (Optional) You could go back to the page "Taxonomy" to add more FAQ Categories and repeat step 3-5

3.4.1.2 Edit Existing FAQ Category

- Go to "Manage" → "Structure" → "Taxonomy".

- Go to "FAQ Category" and click "List terms".

Taxonomy ☆

Home » Admin » Structure » Taxonomy

Taxonomy is for categorizing content. Terms are grouped into vocabularies. For example, a vocabulary called "Fruit" would contain the terms "Apple" and "Banana".

+ Add vocabulary

VOCABULARY NAME	DESCRIPTION	OPERATIONS
+ Document Type	The type of document	List terms ▾
+ Event Categories		List terms ▾
+ Event Organizers		List terms ▾
+ Event Tags		List terms ▾
+ FAQ Category		List terms ▾

3. Select the FAQ Category to be edited and click "Edit".

3.4.1.3 Delete FAQ Category

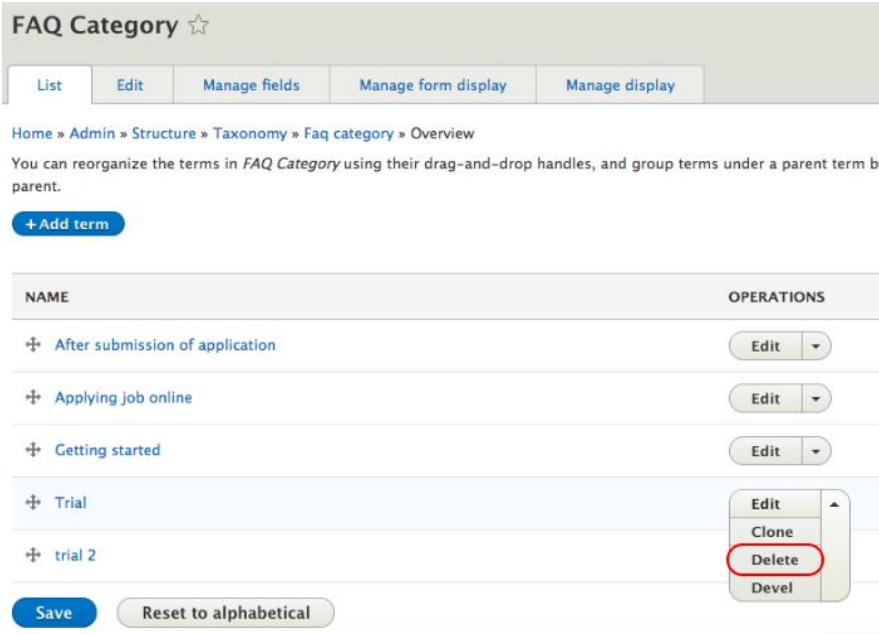

1. Go to "Manage" → "Structure" → "Taxonomy".

2. Go to "FAQ Category" and click "List terms".

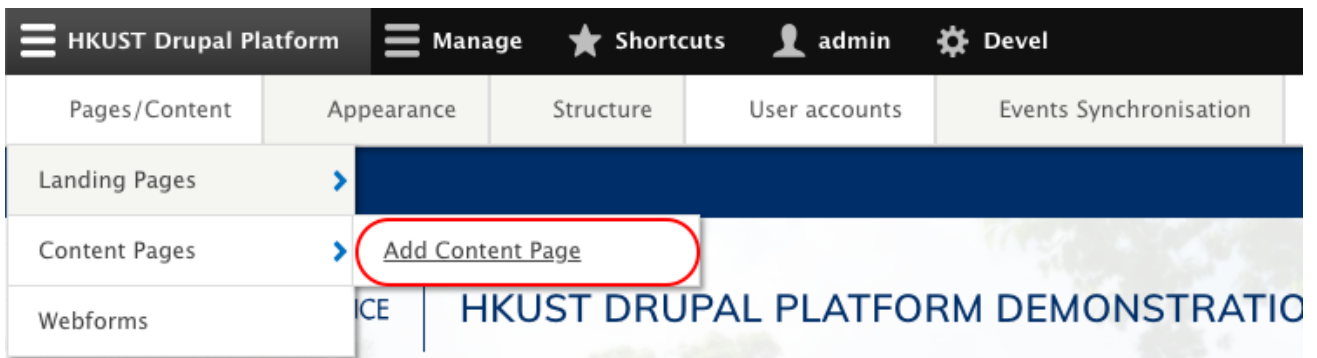

3. Select the FAQ Category to be deleted and click "Delete".

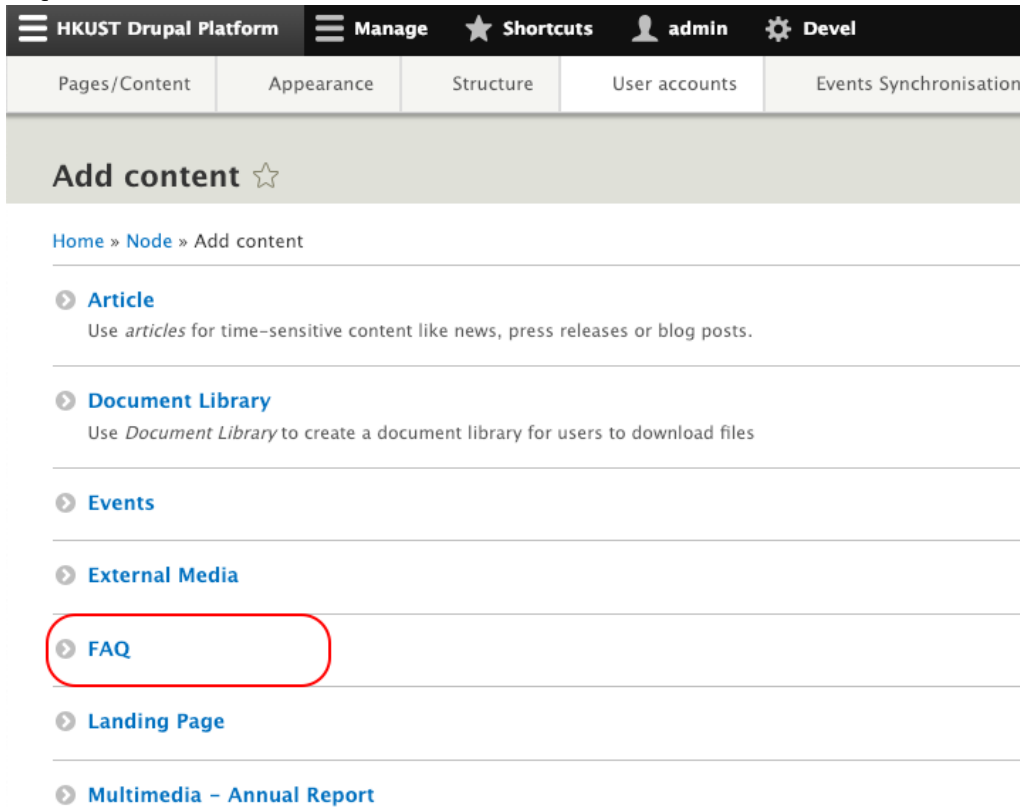

3.4.2 FAQ Type Content

3.4.2.1 Create New Set of Q&A

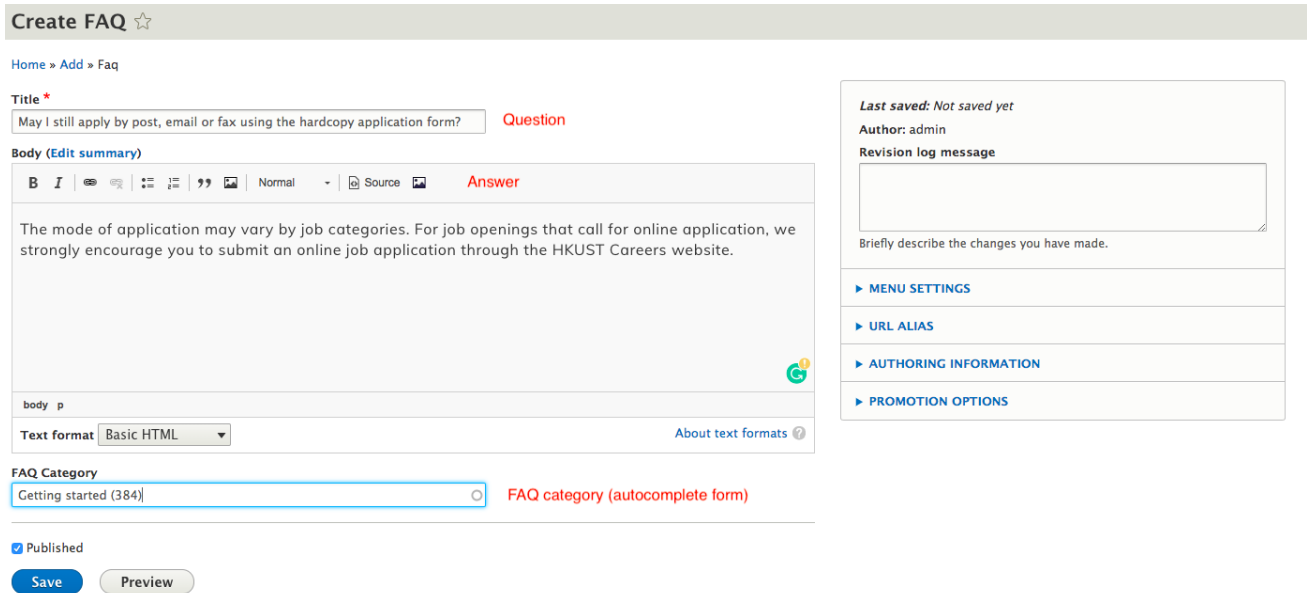

1. Go to "HKUST Drupal Platform" → "Pages/Content" → "Content Pages" → "Add Content Page" and create a new set of Q&A.

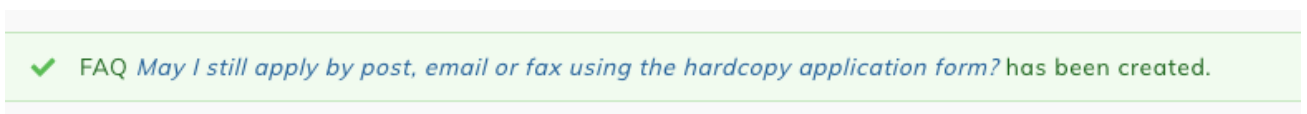

2. Click "FAQ".

3. Input question under "Title", answer under "Body" and specific FAQ category added in 2.7.1.1. Click "Save".

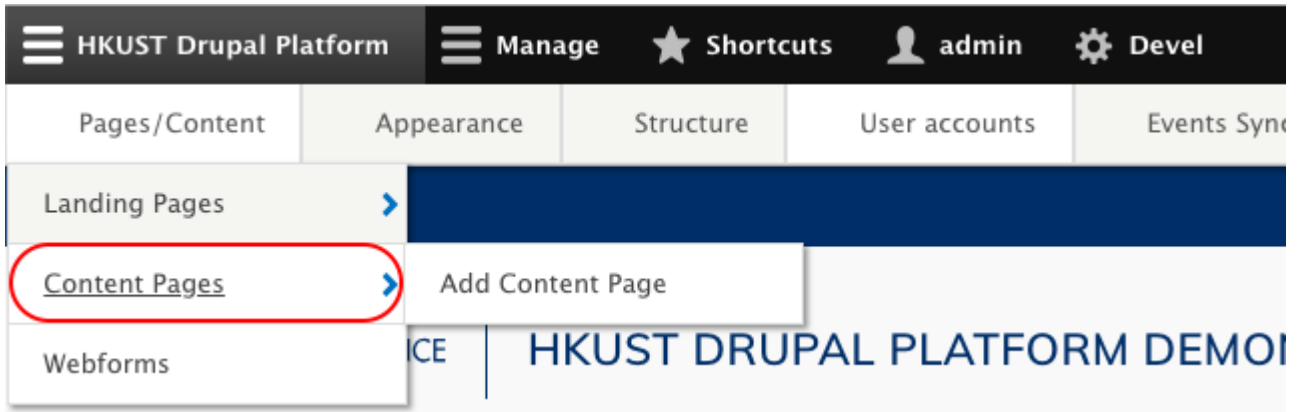

4. A successful message "FAQ XXX has been created" would appear.

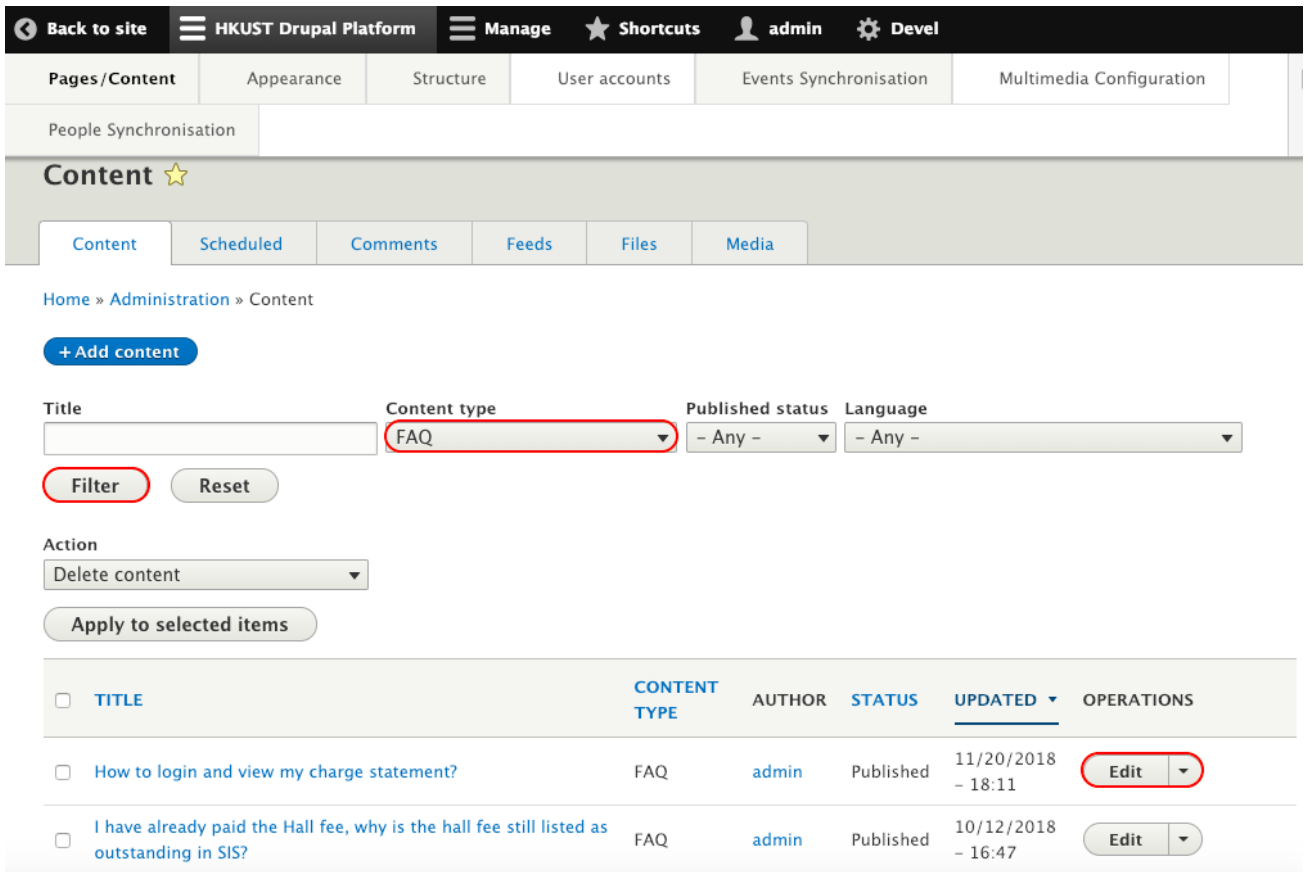

5. Go to the FAQ page of designated website "xxx.ust.hk/FAQ" to see whether the new set of Q&A is correctly displayed.

3.4.2.2 Edit Existing Set of Q&A

1. Go to "HKUST Drupal Platform" → "Pages/Content" → "Content Pages".

2. Select "FAQ" under "Content type" and click "Filter" to filter the FAQ type contents only. Find the target set of Q&A and click "Edit".

3. After editing the content, click "Save".

5. A message "Created new item XXX." would appear.

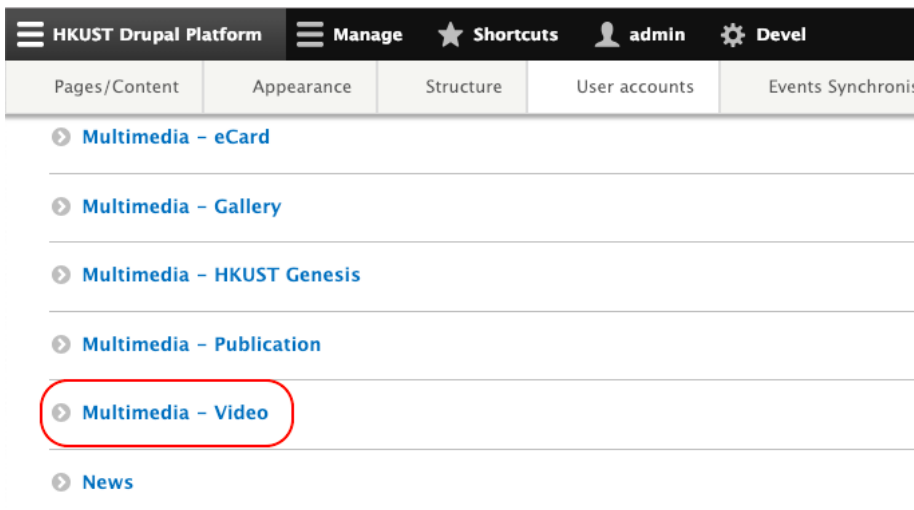

Create New Content (Step 6-9)

6. Go to "HKUST Drupal Platform" → "Pages/Content" → "Content Pages" → "Add Content Page".

7. Select "Multimedia - Video".

8. Input the field listed below, check "Published" and click "Save".

No.	Field Name	Field Nature	Remark
1	Video Category	Mandatory	This is the Video Category defined in Step 1-5.
2	Language	Optional	Default language is English.
3	Thumbnail	Mandatory	Click "Choose file" to upload the image. The optimum image size of Thumbnail is 300 X 186.
4	Alternative text	Optional	In case that Thumbnail does not work, Alternative text will be shown
5	Video Link	Mandatory	URL: The URL should be a YouTube link. In case the video has not been posted on YouTube, the video should be to YouTube before posting the URL. Link text: This is the text shown for the Video Link under Thumbnail.

6	Youku Link	Optional	URL: The URL should be a Youku link. In case the video has not been posted on Youku, the video should be to Youku before posting the URL. Link text: This is the text shown for the Youku Link under Thumbnail.
7	External Link	Optional	URL: The URL is the video link on other servers than YouTube and Youku. Link text: This is the text shown for the External Link under Thumbnail.

9. A successful message "Multimedia - Video XXX has been created." would appear.

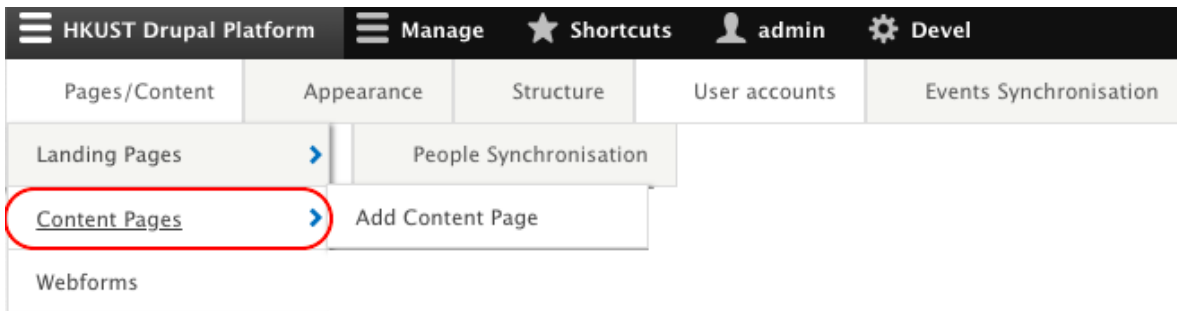

Remark

#4 Step 1-5 can be skipped if the video can be defined with existing Video Category.

3.6.2.2 Edit Existing Video

1. Go to "HKUST Drupal Platform" → "Pages/Content" → "Content Pages".

2. Select "Multimedia - Video" under "Content type" and click "Filter" to filter the Video type contents only. Find the target video and click "Edit".

The screenshot shows the 'Content' administration interface. At the top, there are tabs for 'Content', 'Scheduled', 'Comments', 'Feeds', 'Files', and 'Media'. Below the tabs, there is a breadcrumb trail: 'Home » Administration » Content'. A '+ Add content' button is visible. The main form includes a 'Title' field, a 'Content type' dropdown menu (highlighted with a red circle and containing 'Multimedia - Video'), a 'Published status' dropdown menu (set to '- Any -'), and a 'Language' dropdown menu (set to '- Any -'). Below the form are 'Filter' and 'Reset' buttons. An 'Action' dropdown menu is set to 'Delete content', and an 'Apply to selected items' button is present. A table lists content items with columns: TITLE, CONTENT TYPE, AUTHOR, STATUS, UPDATED, and OPERATIONS. Two items are listed: 'Sample Video' and 'HKUST Corporate Video', both of type 'Multimedia - Video' and status 'Published'. The 'Edit' button for 'Sample Video' is highlighted with a red circle.

TITLE	CONTENT TYPE	AUTHOR	STATUS	UPDATED	OPERATIONS
Sample Video	Multimedia - Video	admin	Published	01/10/2019 - 19:00	Edit
HKUST Corporate Video	Multimedia - Video	admin	Published	12/17/2018 - 10:50	Edit

3. Check "Published" and click "Save" to save the updates.
4. A message "Multimedia - Video XXX has been updated." would appear.

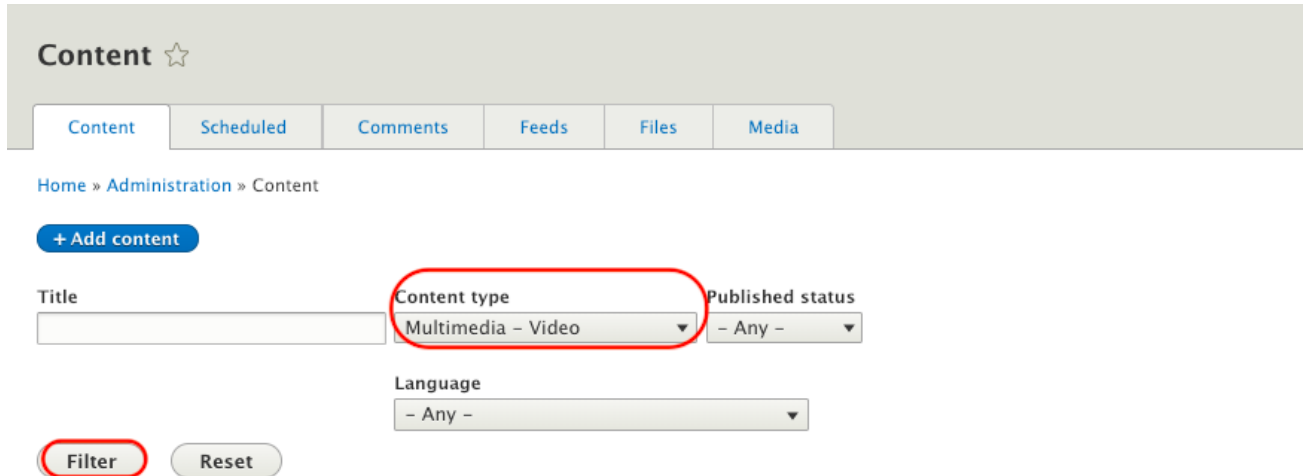

3.6.2.3 Disable Video

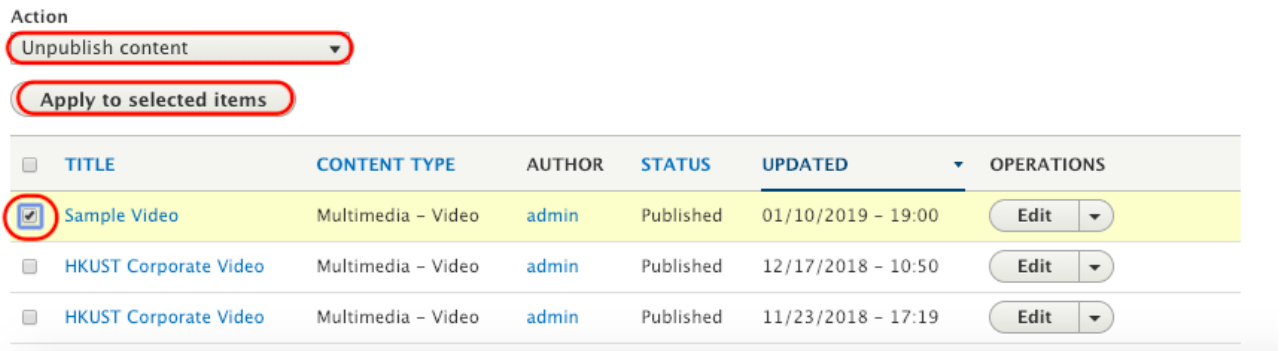

1. Go to "HKUST Drupal Platform" → "Pages / Content" → "Content Pages".

The screenshot shows the Drupal administration interface. The top navigation bar includes 'HKUST Drupal Platform', 'Manage', 'Shortcuts', 'admin', and 'Devel'. Below this is a secondary navigation bar with tabs: 'Pages/Content', 'Appearance', 'Structure', 'User accounts', and 'Events Synchronisation'. The 'Pages/Content' tab is active, showing a sub-menu with 'Landing Pages', 'Content Pages', and 'Webforms'. The 'Content Pages' option is highlighted with a red circle and has a sub-menu open showing 'Add Content Page'.

- Select "Multimedia - Video" under "Content type" and click "Filter" to filter the Video type contents only.

- Select the video to be disabled. Select the Action "Unpublish content" and click "Apply to selected items".

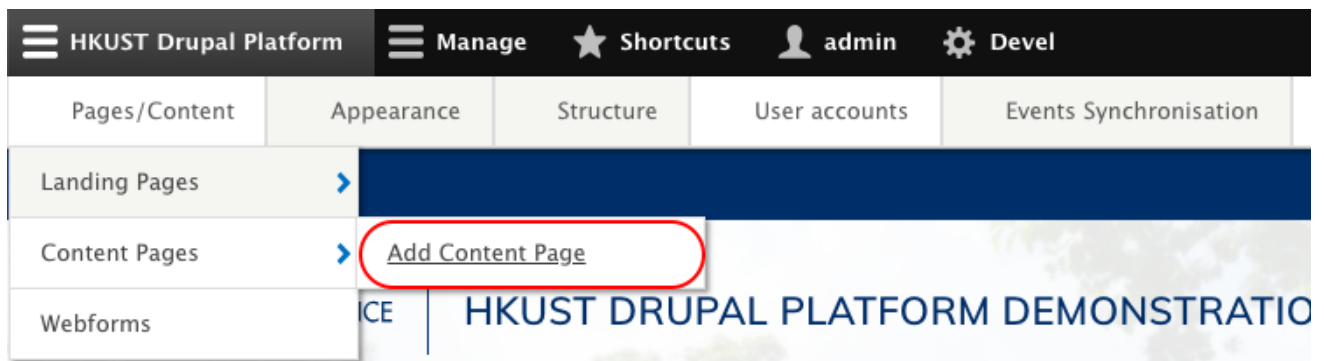

- A message "Unpublish content was applied to X item(s)." would appear.

3.6.3 Gallery

3.6.3.1 Create New Gallery

- Go to "HKUST Drupal Platform" → "Pages/Content" → "Content Pages" → "Add Content Page".

2. Select "Multimedia - Gallery".

Add content ☆

Home » Node » Add content

- **Article**
Use *articles* for time-sensitive content like news, press releases or blog posts.

- **FAQ**

- **Landing Page**

- **Multimedia - Annual Report**

- **Multimedia - eCard**

- **Multimedia - Gallery**

3. Input the field listed below, check "Published" and click "Save".

No.	Field Name	Field Nature	Remark
1	Title	Mandatory	This is the Title of the Gallery.
2	Description	Optional	This is the Description of the Publication.
3	Language	Optional	Default language is English.
4	Thumbnail	Mandatory	Click "Choose file" to upload the image. The optimum image size of Thumbnail is 300 X 186.
5	Images	Optional	Alternative text: Text shown in case that Thumbnail does not work. Title: Title of the image. Add new file: To add additional image to the gallery.

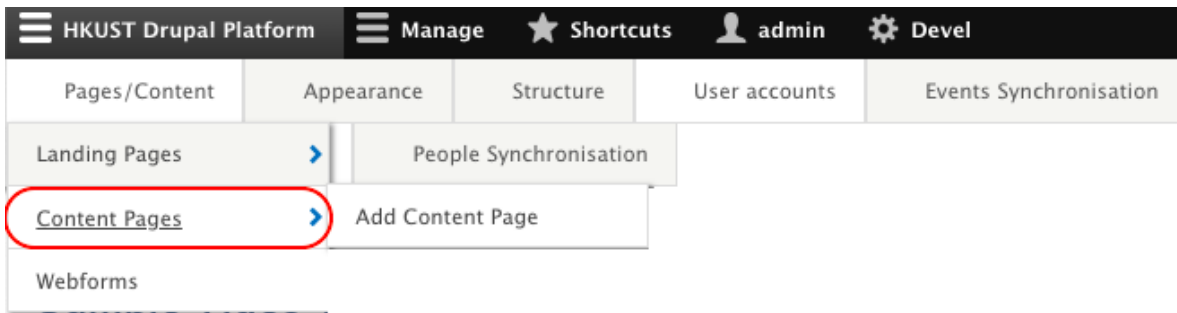

Sequence of images could be changed by dragging the icon,  up and down.

4. A successful message "Multimedia - Gallery XXX has been created." would appear.

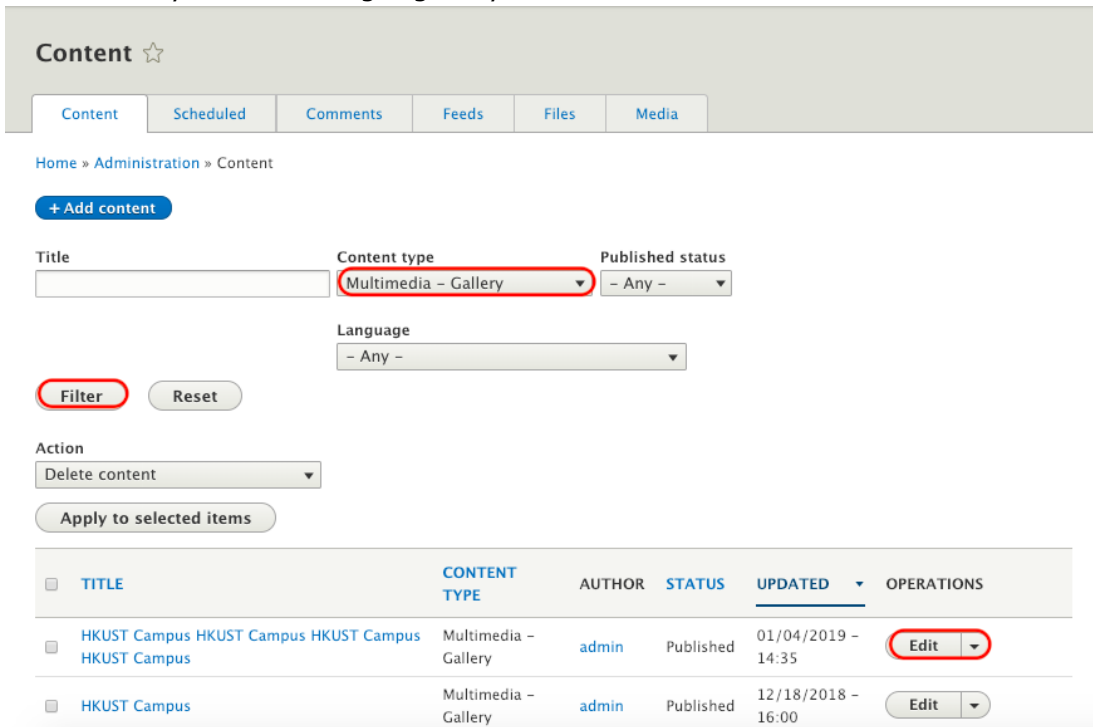

✓ **Multimedia - Gallery *Gallery Testing* has been created.**

3.6.3.2 Edit Existing Gallery

1. Go to “HKUST Drupal Platform” → “Pages/Content” → “Content Pages”.

2. Select “Multimedia - Gallery” under “Content type” and click “Filter” to filter the Gallery type contents only. Find the target gallery and click “Edit”.

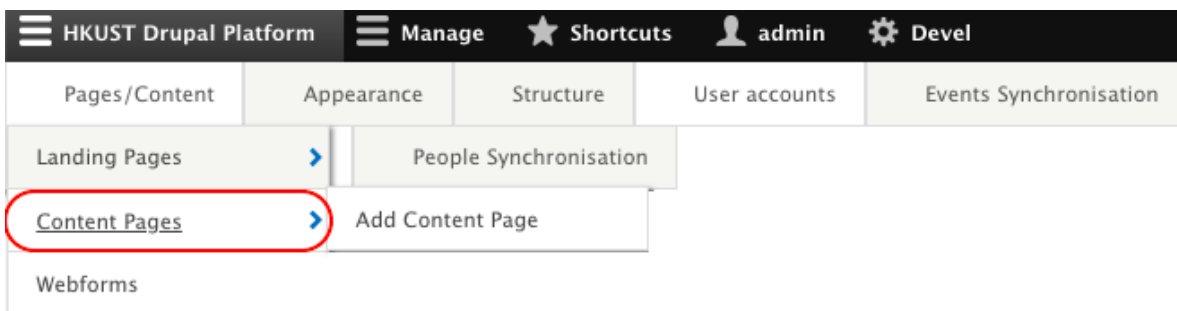

3. Check “Published” and click “Save” to save the updates.
4. A message “Multimedia - Gallery XXX has been updated.” would appear.

3.6.3.3 Disable Gallery

1. Go to “HKUST Drupal Platform” → “Pages / Content” → “Content Pages”.

2. Select "Multimedia - Gallery" under "Content type" and click "Filter" to filter the Gallery type contents only.

The screenshot shows the 'Content' administration page. At the top, there are tabs for 'Content', 'Scheduled', 'Comments', 'Feeds', 'Files', and 'Media'. Below the tabs is a breadcrumb trail: 'Home » Administration » Content'. A '+ Add content' button is visible. The main form contains three fields: 'Title' (text input), 'Content type' (dropdown menu with 'Multimedia - Gallery' selected), and 'Published status' (dropdown menu with '- Any -' selected). Below these is a 'Language' dropdown menu with '- Any -' selected. At the bottom of the form are two buttons: 'Filter' and 'Reset'.

3. Select the gallery to be disabled. Select the Action "Unpublish content" and click "Apply to selected items".

The screenshot shows the 'Action' dropdown menu with 'Unpublish content' selected. Below it is the 'Apply to selected items' button. The main part of the screenshot is a table with the following columns: 'TITLE', 'CONTENT TYPE', 'AUTHOR', 'STATUS', 'UPDATED', and 'OPERATIONS'. The table contains two rows of content items. The first row is highlighted in yellow and has a checkbox selected. The second row is not highlighted and has a checkbox unselected.

<input type="checkbox"/>	TITLE	CONTENT TYPE	AUTHOR	STATUS	UPDATED	OPERATIONS
<input checked="" type="checkbox"/>	HKUST Campus HKUST Campus HKUST Campus HKUST Campus	Multimedia - Gallery	admin	Published	01/04/2019 - 14:35	<input checked="" type="button" value="Edit"/>
<input type="checkbox"/>	HKUST Campus	Multimedia - Gallery	admin	Published	12/18/2018 - 16:00	<input type="button" value="Edit"/>

4. A message "Unpublish content was applied to X item(s)." would appear.

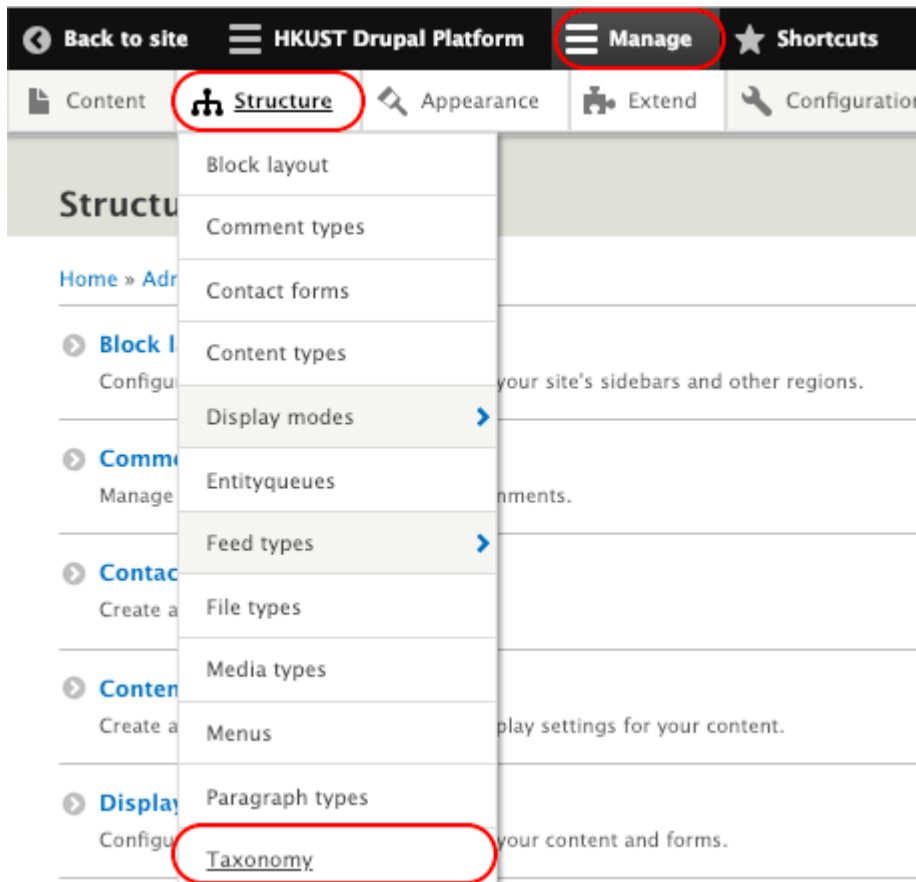

✓ Unpublish content was applied to 1 item.

3.7 News & Events

3.7.1 Add News

Define New News Category (Step 1-5)^{#5}

1. Go to “Manage” → “Structure” → “Taxonomy”.

2. Go to "News Category" and click "List terms".

Taxonomy ☆

[Home](#) » [Administration](#) » [Structure](#) » Taxonomy

Taxonomy is for categorizing content. Terms are grouped into vocabularies. For example, a vocabulary called "Fruit" would contain the terms "Apple" and "Banana".

[+ Add vocabulary](#)

[Show row weights](#)

9 News Title

11 January 2019

The image shows a sample news article layout. At the top, there are three numbered callouts: '3 News Title', '4 News Description', and '14 10 January 2019'. To the right of the date are social media icons for Facebook, LinkedIn, and Email. Below this is a large image area with a callout '6'. The main body of the article is labeled '5 Body' and contains a smaller image of a brain wireframe with callout '11'. Below the main body is a section labeled '13 About UST' and a 'SAMPLE NEWS TAG' field with callout '8' and social media icons. A 'WHAT TO READ NEXT' section follows, featuring a thumbnail with callout '2'. The thumbnail includes a category label '7 SAMPLE NEWS CATEGORY', a title '9 News Title', and a date '11 January 2019'.

Remark

#5 Step 1-5 can be skipped if the news can be defined with existing News Category. Step 6-10 can be skipped if the news does not require any News Tags or can be defined with existing News Tag.

3.7.2 Update Latest News Block

1. Go to the page where Latest News would be added and open Layout Builder.
2. Create a section with layout, CSS class and block stated below.
(Refer to [2.2 Section](#) and [2.3 Block](#) to create section and block)

Section Layout	Section CSS Class	Block
Content Area - Bounded	heading4-with4	HKUST Core → Events: Nearest 3 events

Check "Display title" and "Override title" and click "Add Block".

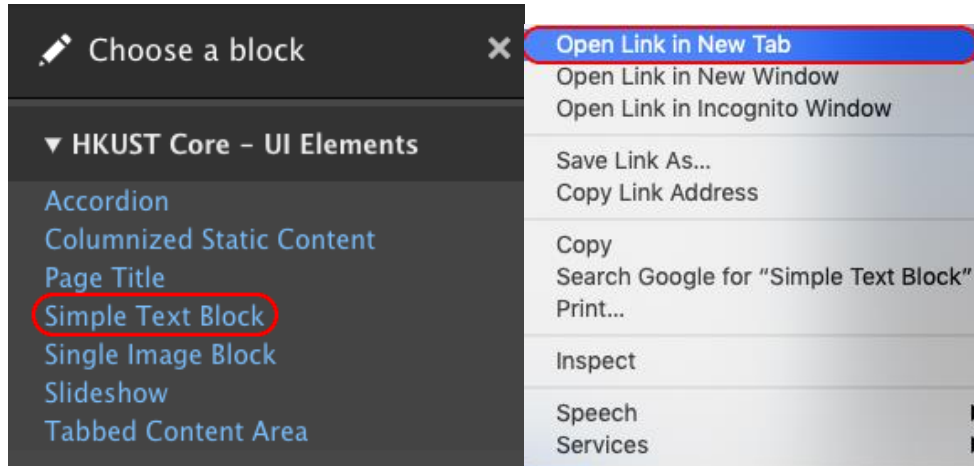

3. Save the layout of the page.

- (Optional) To add a button, "More News" below the Latest News to redirect to the page News, create another section with layout, CSS class and block stated below.

Section Layout	Section CSS Class	Block
Content Area - Bounded	btn-view-more	HKUST Core - UI Elements → Simple Text Block

Go to "HKUST Core - UI Element" and select "Simple Text Block" by right click to open a new tab.

- Uncheck "Display title". Go to "Body" and click "Source". Paste the codes below to the body.

```
<p class="text-align-center"><a class="btn" href="/news">More News</a></p>
```

- Click "Add Block" and save the layout of the page.

3.7.3 Add Event

It is not allowed to add event directly onto HKUST Drupal Platform but events will be interfaced from University Event Calendar. To add new events, please go to University Event Calendar.

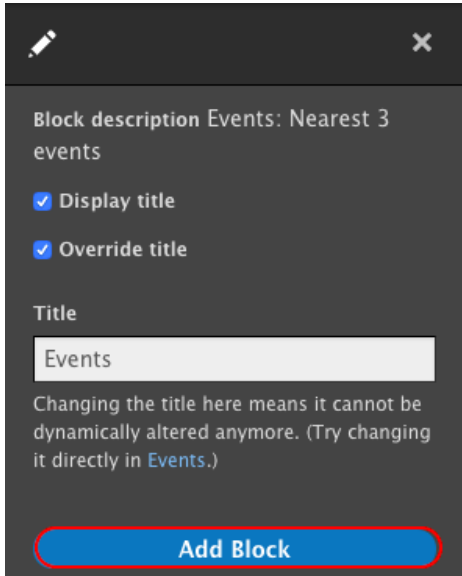

3.7.4 Update Latest Event Block

- Go to the page where Latest News would be added and open Layout Builder.

2. Create a section with layout, CSS class and block stated below.
(Refer to [2.2 Section](#) and [2.3 Block](#) to create section and block)

Section Layout	Section CSS Class	Block
Content Area - Bounded	heading4-with4	HKUST Core → News: Latest 4 News

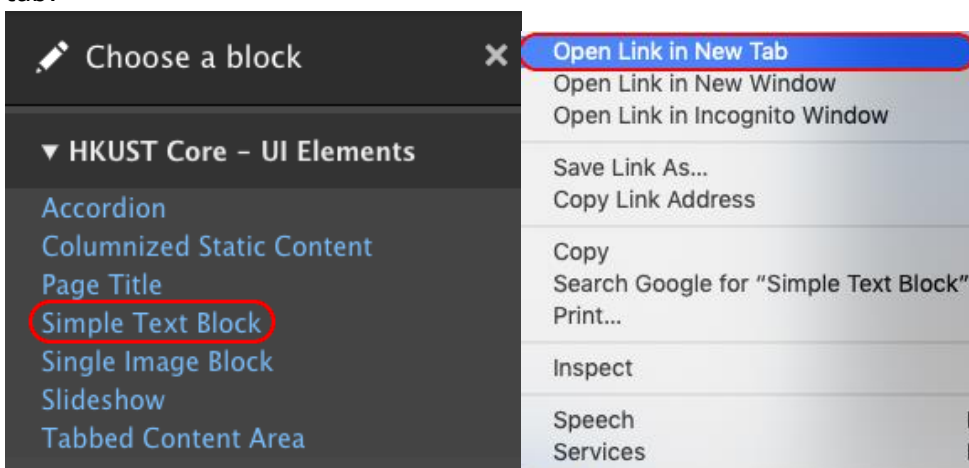

Check "Display title" and "Override title". Click "Add Block".

3. Save the layout of the page.
4. (Optional) To add a button, "More News" below the Latest News to redirect to the page News, create another section with layout, CSS class and block stated below.

Section Layout	Section CSS Class	Block
Content Area - Bounded	btn-view-more	HKUST Core - UI Elements → Simple Text Block

Go to "HKUST Core - UI Element" and select "Simple Text Block" by right click to open a new tab.

- Uncheck "Display title". Go to "Body" and click "Source". Paste the codes below to the body.

```
<p class="text-align-center"><a class="btn" href="/events">More Events</a></p>
```

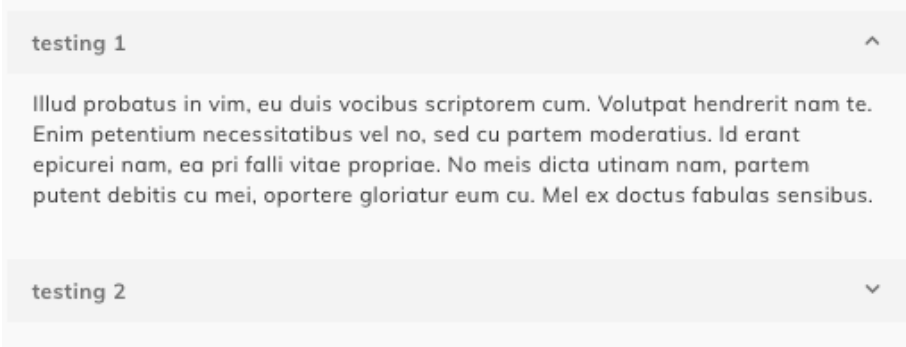

- Click "Add Block" and save the layout of the page.

3.8 Layout Organization

3.8.1 Accordion Module

An Accordion Module is a design where content is grouped into vertical lists on the same page, and each row is expandable one-by-one by clicking the content's corresponding first row without redirecting to another page. Below is a sample Accordion Module for reference.

ACCORDION EXAMPLE

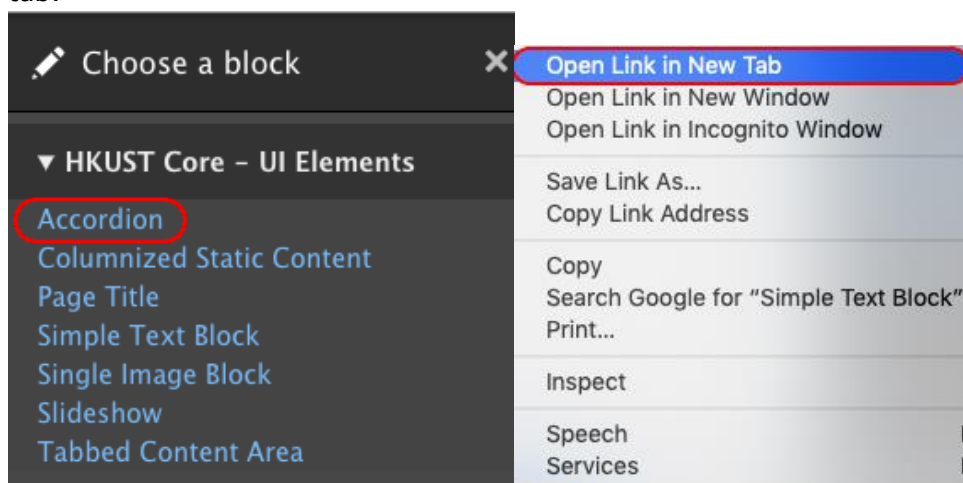

In this section, you will learn how to create, edit and delete an Accordion Module.

- Create a section with layout and CSS class and block stated below.
(Refer to [2.2 Section](#) and [2.3 Block](#) to create section and block)

Section Layout	Section CSS Class	Block
Content Area - Bounded	Nil	HKUST Core - UI Elements → Accordion

Go to "HKUST Core - UI Element" and select "Tabbed Content Area" by right click to open a new tab.

2. Input the field listed below.

No.	Field Name	Field Nature	Remark
1	Title	Mandatory	This is the Title of Accordion Module. Uncheck "Display title" to hide the title.
2	Contents	Optional	Title: This is the title of item. Body: This is the body of item. The text styling is same as Simple Text Block. Refer to 3.1.1 Text Editing Format for text styling. To remove the item, click "Remove"

Click "Add one more" to add another tab to the Accordion Module.

Sequence of tabs could be changed by dragging the icon,  up and down.

3. Click "Add Block" after finish editing and save the layout of the page.

3.8.2 Tab Module

A Tab Module is a design where content is separated into different panes on the same page, and each pane is viewable one at a time by clicking the content's corresponding tab control without redirecting to another page. Below is a sample Tab Module for reference.

TABBED CONTENT AREA

lorem ipsum

Testing 2

testing 3

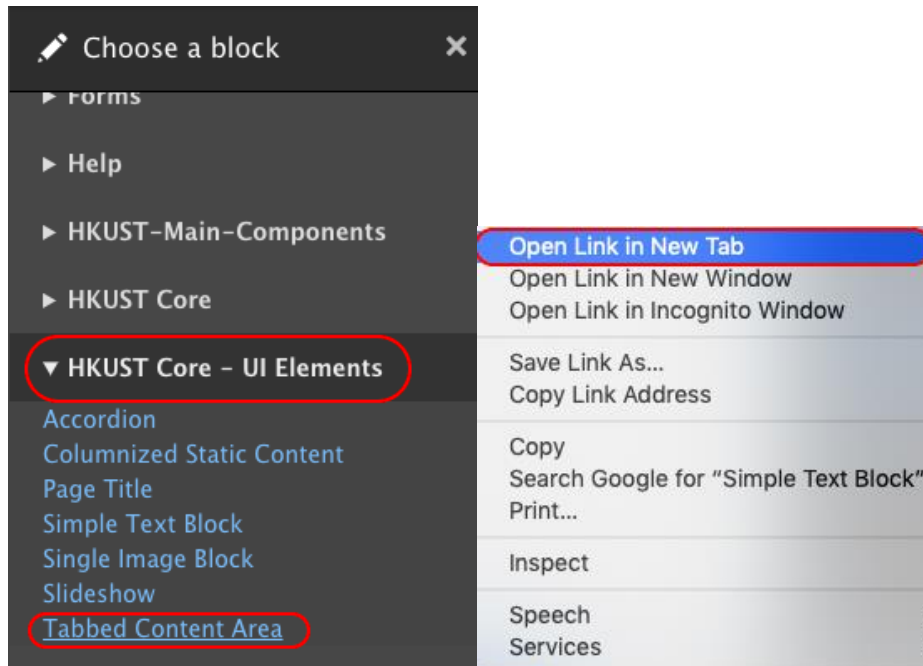

Lorem ipsum dolor sit amet, an aeterno perfecto qui, pri eu facete imperdiet. Cum ad delicata pericula dissentias, ius in paulo conclusionemque. Eam minim iisque saperet cu, habeo dicant ei ius. Mea ut possim numquam, nostrum voluptua laboramus id mei.

In this section, you will learn how to create, edit and delete a Tab Module.

1. Create a section with layout and CSS class and block stated below.
(Refer to [2.2 Section](#) and [2.3 Block](#) to create section and block)

Section Layout	Section CSS Class	Block
Content Area - Bounded	Nil	HKUST Core - UI Elements → Tabbed Content Area

Go to "HKUST Core - UI Element" and select "Tabbed Content Area" by right click to open a new tab.

2. Input the field listed below.

No.	Field Name	Field Nature	Remark
1	Title	Mandatory	This is the Title of Tab Module. Uncheck "Display title" to hide the title.
2	Contents	Optional	Title: This is the title of tab. Body: This is the body of tab. The text styling is same as Simple Text Block. Refer to 3.1.1 Text Editing Format for text styling. To remove the tab, click "Remove"

Click "Add one more" to add another tab to the Tab Module.

Sequence of tabs could be changed by dragging the icon,  up and down.

3. Click "Add Block" after finish editing and save the layout of the page.

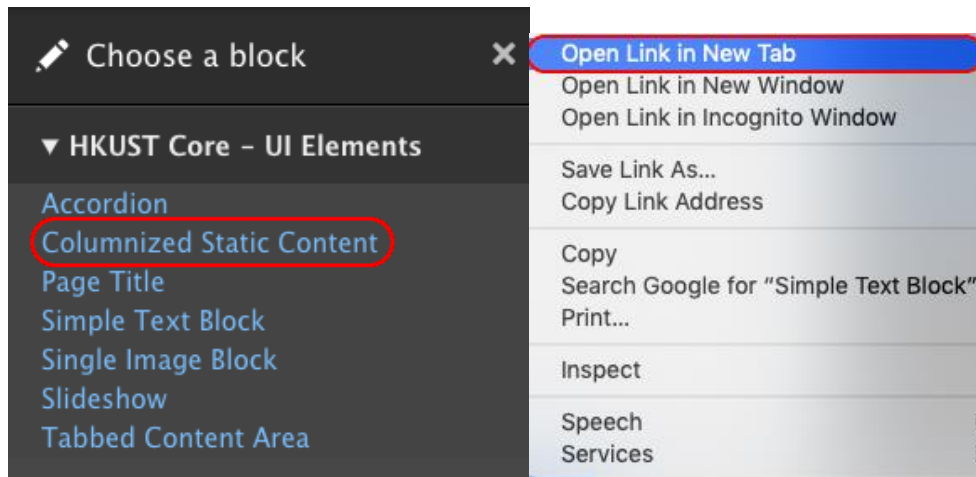

3.8.3 Columnized Static Content

Columnized Static Content is a block used to divide the section into two (or more) parts. It does not limit user with the number of columns per section.

1. Create a section with layout and CSS class and block stated below.
(Refer to [2.2 Section](#) and [2.3 Block](#) to create section and block)

Section Layout	Section CSS Class	Block
Content Area - Full Width	heading4-with4	HKUST Core - UI Elements → Columnized Static Content
Content Area - Bounded	heading4-with4	HKUST Core - UI Elements → Columnized Static Content

Go to "HKUST Core - UI Element" and select "Columnized Static Content" by right click to open a new tab.

2. Input the field listed below.

No.	Field Name	Field Nature	Remark
1	Title	Mandatory	This is the title of section. Uncheck "Display title" to hide the title.
2	Contents	Optional	Title: This is the title of column. Body: This is the body of column. The text styling is same as Simple Text Block. Refer to 3.1.1 Text Editing Format for text styling. To remove the tab, click "Remove"

Click "Add one more" to add another tab to the section.

Sequence of section could be changed by dragging the icon,  up and down.

3. Click "Add Block" after finish editing and save the layout of the page.

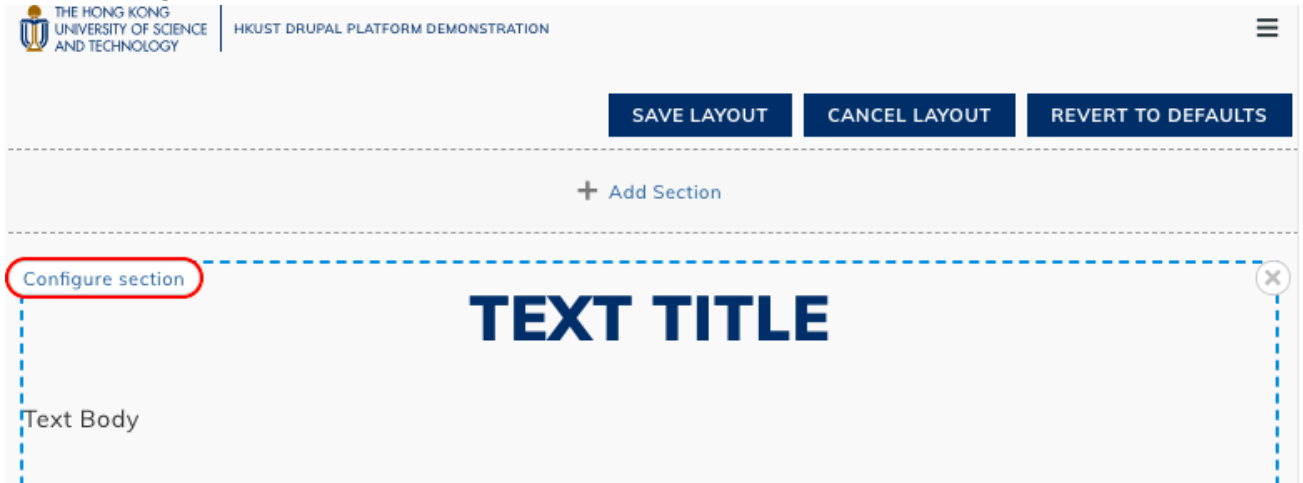

3.8.4 Section Break

Prerequisite:

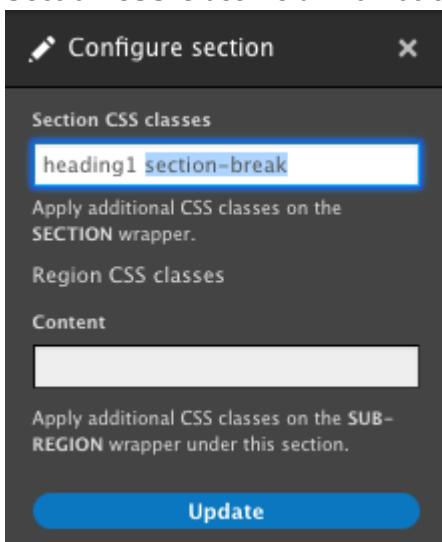

Create a section with layout and CSS class and block stated below.
 (Refer to [2.2 Section](#) and [2.3 Block](#) to create section and block)

Section Layout	Section CSS Class	Block
Content Area - Full Width	section-break	(Any Blocks)
Content Area - Bounded	section-break	(Any Blocks)

1. Click "Configure section".

2. To insert a break before the section, insert " section-break" after the original CSS Class in Section CSS Class field. Do not to input any symbols like "," or ";" between the CSS Classes.

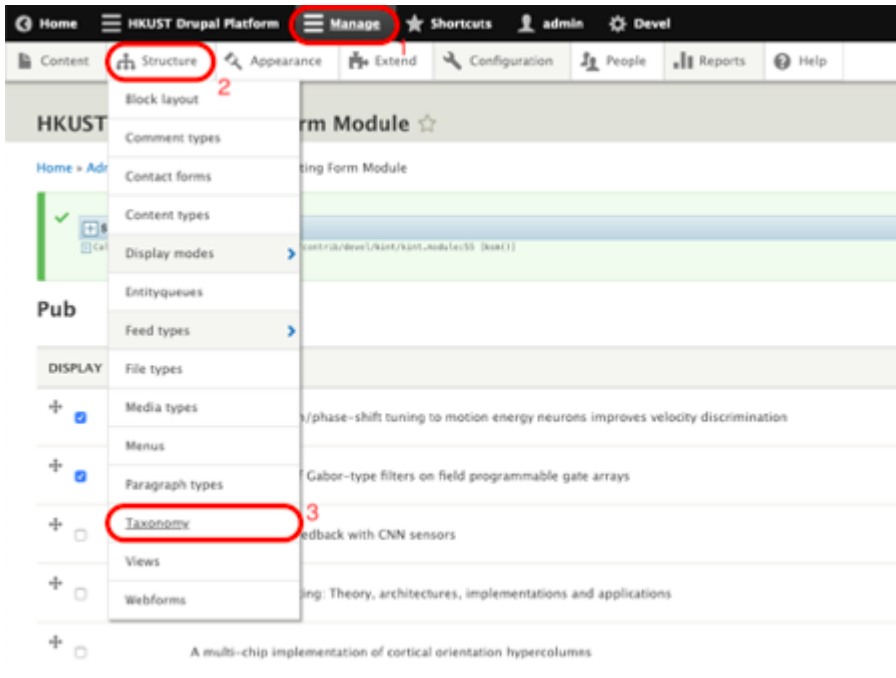

3.9 People

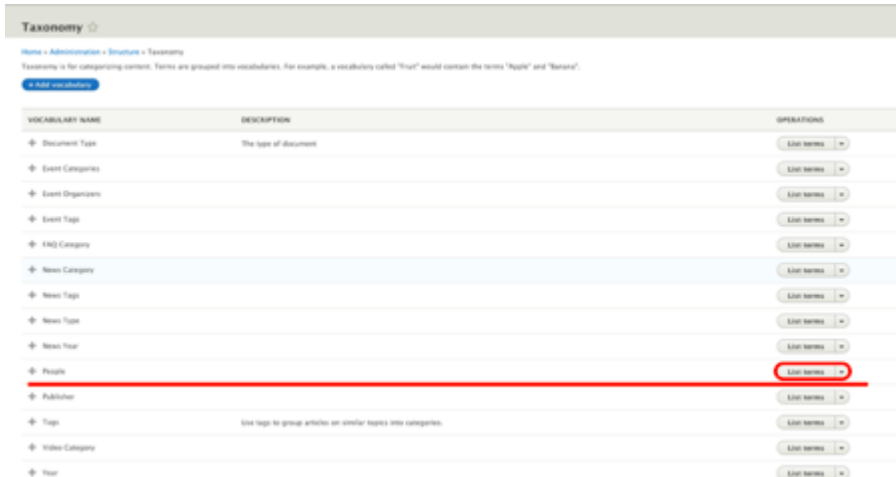

3.9.1 Define People Category

Each site has its unique people category. As a consequence, we need to define the people category before the content migration. Taking "ce.ust.hk" as an example, "staff" and "faculty" are the terms needed to be defined.

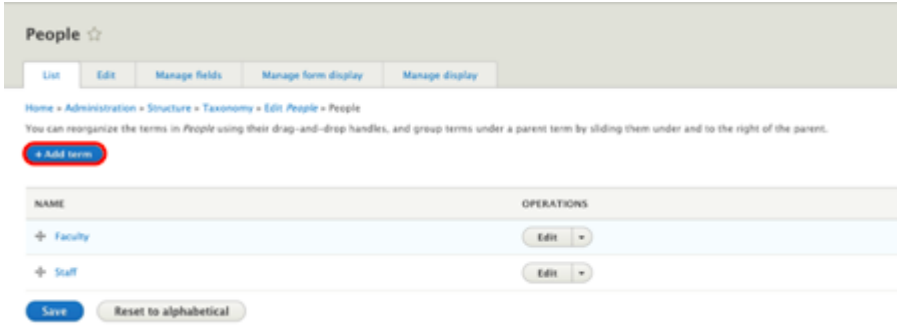

1. Go to "Manage" → "Structure" → "Taxonomy".

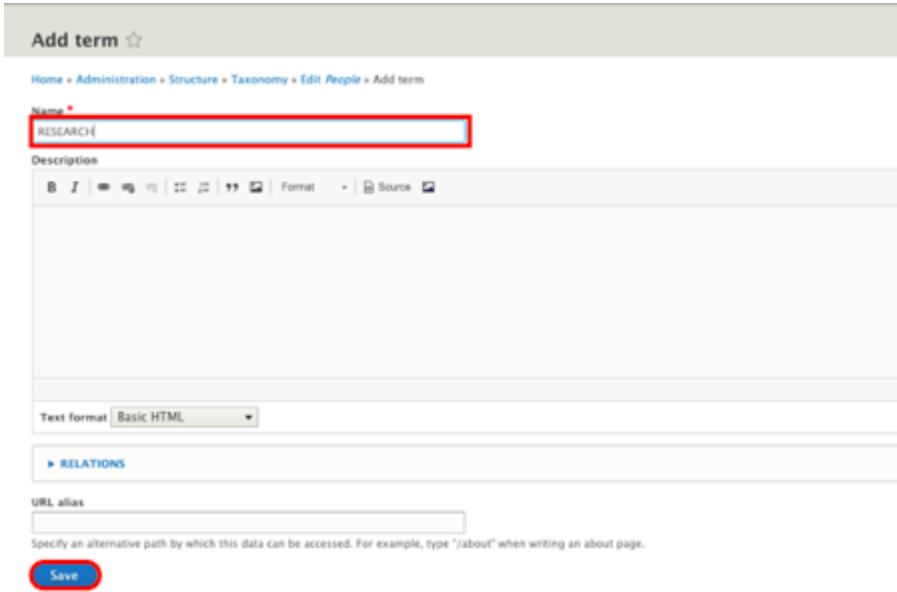

2. Go to the category "People" and click "Edit terms".

3. Click "Add term".

4. Insert the People Category under "Name" and click "Save".

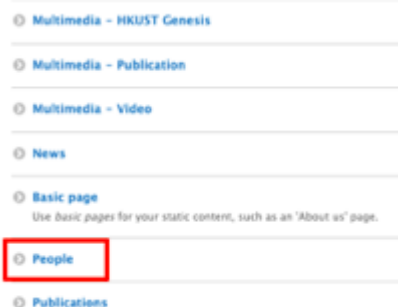

5. The page will be returned to People Listing Page. Sequence of tabs could be changed by dragging the icon,  up and down.

3.9.2 Add People

1. Go to "Manage" → "Content". Click "Add content".

2. Select the content type, "People".

3. Input the field listed below. Check "Display Details Page" and "Published". Click "Save".

Field name	Faculty	Staff	Remark
ITSC Account	Not Required (To be interfaced from HR system)	Not Required	ITSC account is for grab faculty data
Personal Category	Optional	Optional	Faculty / Staff
Name	Mandatory	Mandatory	Name of the contact. Can be searched in Content. Will not be shown in site Default format: Jang Kyo KIM 金章教

Display Details Page

Published

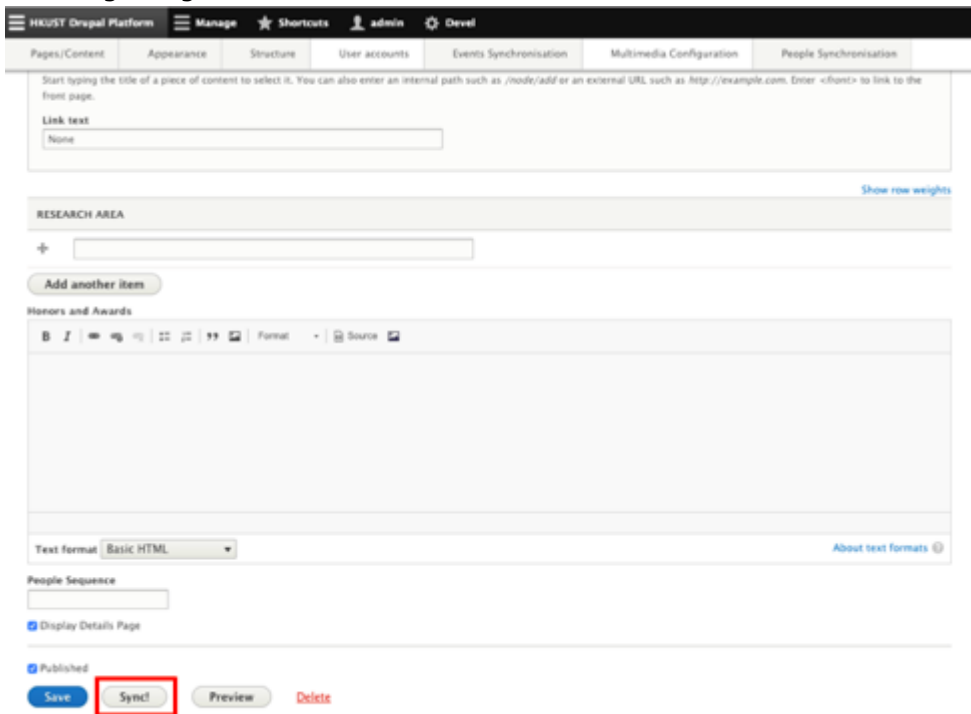

- A message "People XXX has been created." would appear.

✓ People *Jang Kyo KIM 金章教* has been created.

- After Save the content. It will redirect to content page. People data on the site is not yet synchronized yet. Click "Edit".

- Click "Sync!" at the bottom of the page. Click it to synchronize the basic content, publication & teaching assignment to the site.

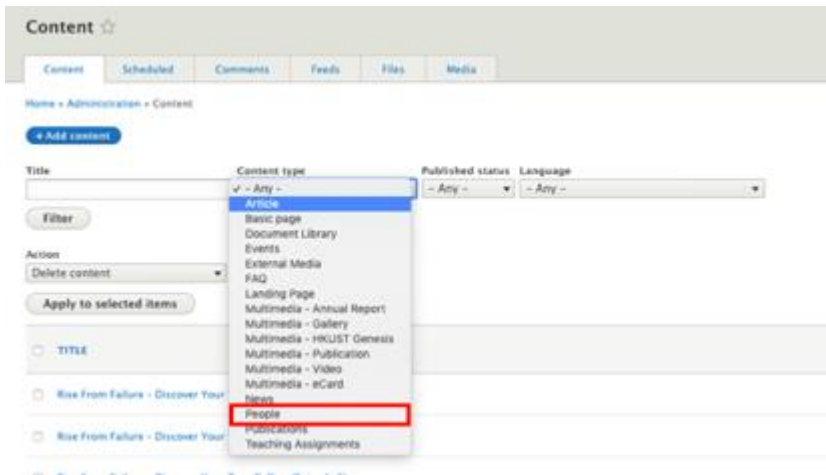

3.9.3 Update Existing People

- Click "Manage" → "Content".

- Select "People" under "Content type" and click "Filter" to filter the People type contents only. Find the target people and click "Edit".

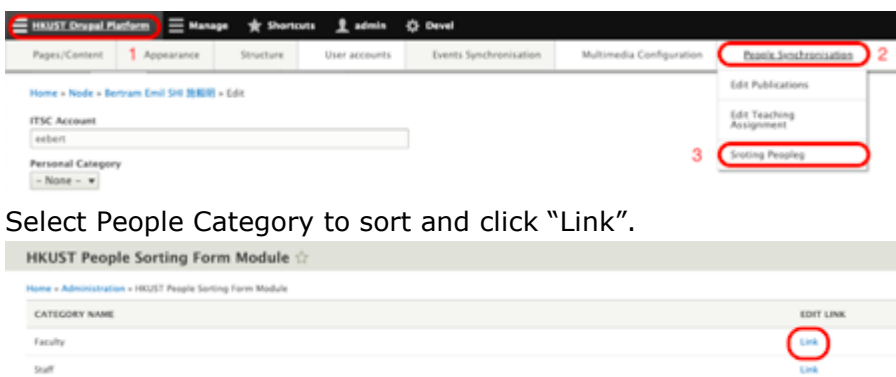

3. For example, we can update Personal Category. After editing, click "Save".

3.9.4 People Sequencing

1. Go to "HKUST Drupal Platform" → "People Synchronisation" → "Sorting People".

3. Sequence of tabs could be changed by dragging the icon,  up and down.
4. Click "Save changes".

3.9.5 Edit Publication of People

1. Go to "HKUST Drupal Platform" → "People Synchronisation" → "Edit Publications".

2. Click "Link" to edit faculty or staff.

3. Tick which publication you want to display.

4. Sequence of tabs could be changed by dragging the icon,  up and down.
5. Click "Save changes".

Part 4 | Get Pages Navigated

The screenshot shows a website header and main content area. Key elements are annotated with red boxes and labels:

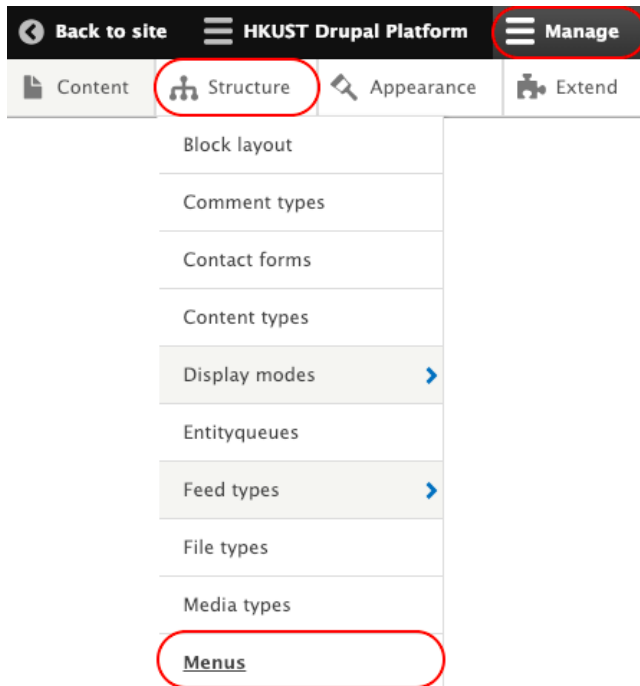

- 4.2 Top Menu:** A blue navigation bar at the top containing the text "4.2 Top Menu".
- 4.1 Main Navigation Menu:** A horizontal menu below the top bar with items: NEWS, EVENTS, PEOPLE, MULTIMEDIA, FAQ, EXAMPLE.
- 4.3 Footer:** A large section containing five sample footer blocks:
 - Sample Footer 1:** Sub-item 1, Sub-item 2, Sub-item 3, Sub-item 4.
 - Sample Footer 2:** %20, Sub-item 5, Sub-item 6, Sub-item 7.
 - Sample Footer 3:** Sample Footer 3, Sub-item 8, Sub-item 9.
 - Sample Footer 4:** Sample Footer 4, Sub-item 10.
 - Sample Footer 5:** Sample Footer 5, Sub-item 11, Sub-item 12, Sub-item 13, Sub-item 14, Sub-item 15.
- 4.4 Footer Toolbar:** A dark blue bar at the bottom containing the HKUST logo, links for Privacy, Sitemap, and Contact Us, and a toolbar with buttons: View, Edit, Delete, Layout, Revisions, Devel, Clone, Translate, Export, Overwrite.

In this part, you will learn how to edit different menus. The following parts will cover:

- Adding menu items
- Editing menu items
- Disabling menu items

4.1 Main Navigation Menu

1. Go to “Manage” → “Structure” → “Menu”.

2. Go to “Main navigation” and click “Edit menu”.

TITLE	DESCRIPTION	OPERATIONS
Administration	Administrative task links	Edit menu ▾
Development	Links related to Devel module.	Edit menu ▾
Footer	Site information links	Edit menu ▾
Footer Toolbar		Edit menu ▾
Main navigation	Site section links	Edit menu ▾

3. Click "Add link" to add new menu item in Main Navigation Menu or

Sitemap display name

A user-friendly name for the menu that will display on the sitemap.

Select the menu item to be edited and click "Edit" or To disable the menu item by unchecking "Enabled".

The first level of menu item^{#6} is defined in columns, which would be used to sort the Footer menu by columns but not be shown in Footer.

MENU LINK	ENABLED	OPERATIONS
✚ Column 1	<input checked="" type="checkbox"/>	Edit ▾
✚ Sample Footer	<input checked="" type="checkbox"/>	Edit ▾
✚ Sub-item 1	<input checked="" type="checkbox"/>	Edit ▾
✚ Sub-item 2	<input checked="" type="checkbox"/>	Edit ▾
✚ Sub-item 3	<input checked="" type="checkbox"/>	Edit ▾
✚ Sub-item 4	<input checked="" type="checkbox"/>	Edit ▾
✚ Column 2	<input checked="" type="checkbox"/>	Edit ▾
✚ %20	<input checked="" type="checkbox"/>	Edit ▾

Ordering of menu item could be changed by dragging the icon, in different directions:

- Up / Down: Sequence
- Right / Left: Indent Level

4. Input the field listed below for menu item and save after editing.

No.	Field Name	Field Nature	Remark
1	Menu link title	Mandatory	This is the title of the menu item.
2	Link	Mandatory	<p>This is for inserting links to menu item. For links to internal pages, it is not required to insert the domain. For example, in the site "http://demonstration5.aegir-dev2.ust.hk/", if the link is to be redirected to News "http://demonstration5.aegir-dev2.ust.hk/news", only the link <code>"/news"</code> should be inserted.</p> <p>For the menu item without link, put <code>"route:<no link>"</code> and do not uncheck the box "Enabled" even for menu item without link. Refer to the sample below.</p> 
3	Description	Optional	Description shown when hovering over the menu link.
4	Icon Image	Optional	Click "Choose file" to upload image from local path.
5	Parent link	Optional	Link with a parent link if the link to be created is a child link.
6	Weight	Optional	This is to prioritise fields in footer menu under same parent links.

5. Save the menu.

Apply Footer to Site (Step 6-15)

6. Go to "Manage" → "Appearance".

7. Click "Block Layout".

Appearance ☆

List Settings

Home » Administration » Appearance

Set and configure the default theme for your website. Alternative themes are available.

You can place blocks for each theme on the **block layout** page.

8. Click "Custom Block Library" → "Block types". Go to Footer Menu and select "Manage display".

Custom block library ☆

Block layout **Custom block library**

Blocks **Block types**

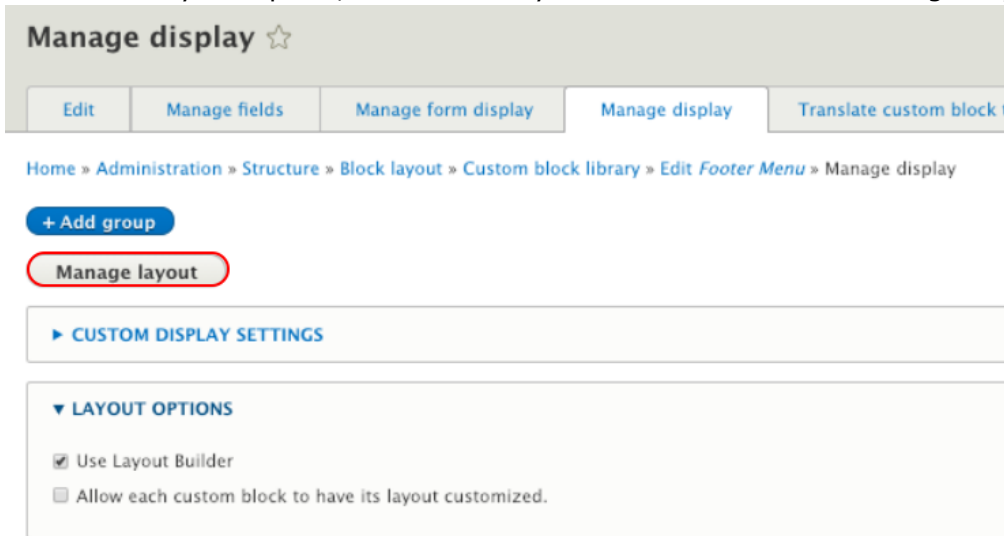

Home » Administration » Structure » Block layout » Custom block library » Custom block library

Each block type has its own fields and display settings. Create blocks of each type on the **Blocks** page in the custom block library.

[+ Add custom block type](#)

BLOCK TYPE	DESCRIPTION	OPERATIONS
Basic block	A basic block contains a title and a body.	Manage fields ▾
Footer Menu		<ul style="list-style-type: none"> Manage fields Manage form display Manage display Edit Translate Clone Delete Devel

9. Select the Layout Option, check "Use Layout Builder" and click "Manage Layout

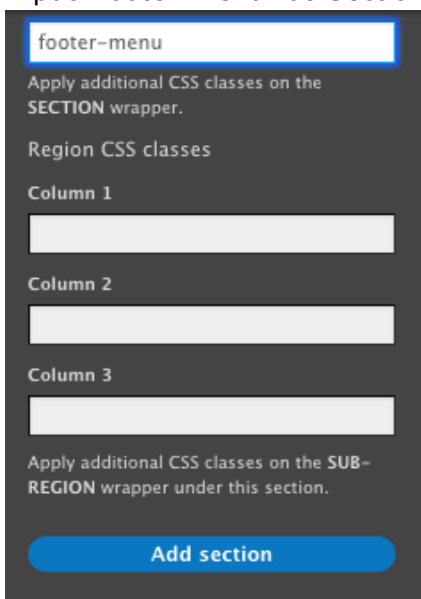

10. Click "Manage Layout" to redirect to the footer Layout Builder. Create a section with layout according to the number of columns needed for Footer. The following commonly-used section layouts are recommended for Footer. They include:

- Content Area - Two Columns (50/50)
- Content Area - Three columns (33/33/33)
- Content Area - Four columns (25/25/25/25)
- Content Area - Five columns (20/20/20/20/20)

(Refer to [2.2 Section](#) to create section)

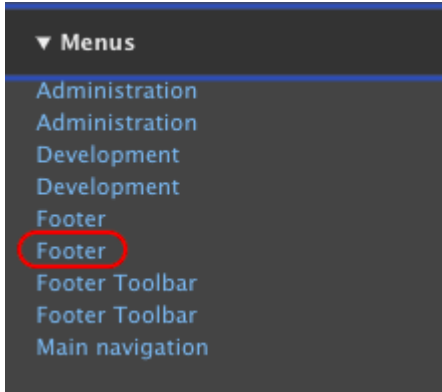

Input "footer-menu" as Section CSS Class and click "Add section".

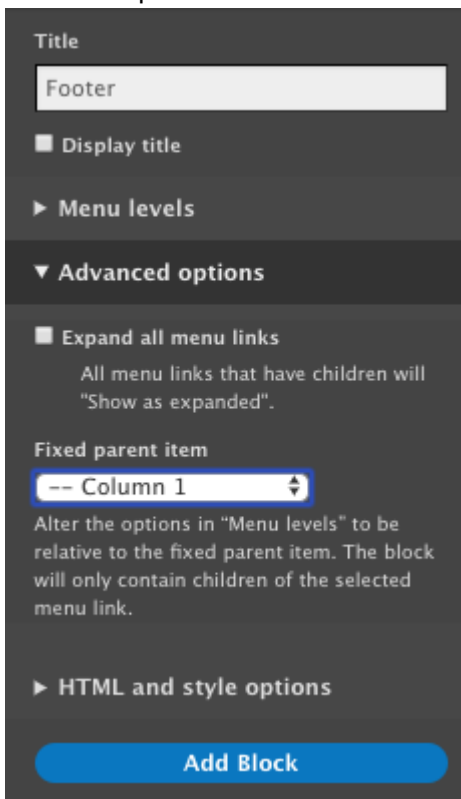

11. Click "Add Block" for each column.

12. Go to "Menus", select "Footer".

13. Uncheck the box "Display title". Go to "Advanced options" and choose the designated column as the Fixed parent item. Click "Add Block".

14. Save the layout of the page.

15. It is redirected to the page "Manage display". Click "Save" to save the footer menu layout.
