HKUST to showcase Hi-Tech in China

The Hong Kong University of Science and Technology (HKUST) will showcase its latest technology achievement at the 8th annual China Hi-Tech Fair (CHTF) at the Shenzhen Convention and Exhibition Center from 12 to 17 October 2006.

Fourteen hi-tech products and systems developed by the University’s researchers and member companies of the HKUST Entrepreneurship Program will be on display, such as:

- **Nanocatalytic System**: Adopting the most advanced nanotechnology, the system can remove impurities in the air more effectively than conventional de-contaminating agents and can be integrated with the di-humidifiers for use in catering establishments, households, cars and clinics.

- **3D Camera Scanner**: It provides multi-resolution imaging, accurate 3D calibration and multi-view integration and can be widely used in many fields, such as orthodontics, plastic surgery, and movie and entertainment industry.

- **Furniture Virtual Reality Exhibition System**: It is an integrative technology of visual display and simulated reality environment. With the help of this software, customers can build up a 3D model interactively for their apartments, and then pick and place their favorite 3D furniture models and decorations in the computer-generated environment for virtual reality viewing.

- **C² Business Collaboration Platform**: It provides critical enterprise capabilities, including audio, video conferencing, instant messaging, white board, and document sharing, which ensure cost-effectiveness, high efficiency and information sharing.

Details of the Fair are as follows:

**China Hi-Tech Fair 2006**

**Date**: 12-17 October 2006  
**Venue**: Shenzhen Convention and Exhibition Center, Shenzhen
